Superform **Online** has been operating since 1986. Its primary objective has always been to provide handicapping facilities to those who are already experienced in the methods of handicapping. The service has been successful in that aim, but has also proved itself to be an appropriate tool for novice handicappers because of the depth of information being provided, the ease of operation and the ability to carry out “what if” type experiments.

All program design has been based on the premise that the system must be able to be operated by a person who has little, or no knowledge about computers.

The basis of the Superform **Online** system is that we provide the programs/facilities and charge the subscriber for the use of the data.

From a user's point of view, there are three components which make up Superform **Online**:

- Computer equipment. Capable of running Windows 98 or above.
- Computer programs. These are supplied by SuccessAbility. These programs are supplied free of charge.
- Data Files. These are the files that you will need to perform any analysis with the Superform **Online** system. They contain information about the horse's previous starts as well as additional handicapping and statistical data. Data Files are charged at the rate of \$5.50 for all Australian and New Zealand TAB meeting for that day.

The following is a brief description on how the Superform **Online** system works.

- Once acceptances for a meeting are available, we run various computer programs which search through our extensive database and extract historical information for the acceptors.
- Handicapping and interrogation programs then run through all this information and produce data and race files for the Superform **Online** system.
- These files are placed on our webserver to which only our subscribers have access. Using Superform **Online** and an internet connection the subscriber decides which files (races) they wish to pull back onto their own computer for subsequent handicapping.

Superform *Online***System Requirements**

Superform **Online** is only compatible with Microsoft Windows.

- Windows 98 or above.
- Internet connection.
- Printer (optional).

Superform *Online***Programs**

Superform **Online** programs are supplied free of charge and you are able to make backup copies of the programs if you wish. The Superform **Online** programs and concepts are subject to Australian and International copyright laws and as such the Superform **Online** programs are supplied for personal use only. The programs are only useful when a subscriber is currently active in the Superform **Online** system, and access is restricted through a password system.

From time to time a new version of Superform **Online** will be made available on Successability's website www.everyrace.com. To check for a new version, login using your everyrace details, once logged in select “Superform” from the menu down the left hand side then select “Superform Online” and note the current version that is available. If your version is out of date follow the onscreen instructions to download and install the new version.

Superform *Online***Files**

There are a number of file types in the Superform **Online** system, described below. However, we stress that it is not necessary for a subscriber to know what the files are called or indeed what they contain – the Superform **Online** system keeps track of the files and provides a “user friendly” interface to the subscriber when it needs to know which file the subscriber is looking for.

- SUBS FILES. These files contain all the horse's form and race information. The files are encrypted to prevent unauthorised decoding of the information.
- JOCKEY FILES. Jockey files are used to update the SUBS files which are already on your system. These files are prepared so that you may do preliminary processing of your SUBS files and finish off handicapping once the final (or more complete) list of jockey engagements are known.

- **TRAINER FILES.** The trainer report files are described in detail elsewhere in this manual. See the Contents page for location details.
- **ERA REPORT FILES.** The ERA report files are described in detail elsewhere in this manual. See the Contents page for location details.
- **MODEL FILES.** The Model report files are described in detail elsewhere in this manual. See the Contents page for location details.
- **SCRATCHING FILES.** The scratching files contain the latest scratchings and rider changes available on race morning.

As well as these there are several auxiliary files. These are:

- **COURSE FILE** The course file contains all the courses used by Superform **Online**. This file is updated once a week.
- **JOCKEY FILE** The jockey file contains all the jockeys used by Superform **Online**. This file is updated once a week.
- **TRAINER FILE** The trainer file contains all the trainers used by Superform Online. This file is updated once a week.

Superform **Online** Meetings Available

Superform **Online** provides an extensive range of meetings covering all Australian and New Zealand gallop meetings the TAB cover. While all TAB meetings are covered Superform **Online** can also prepare **Online** files for lesser known meetings. These meetings are called **On Request**. The **On Request** meetings can be provided at any time for any venue, but we need 48 hours notice of the requirement. While our standard cost for a day is \$5.50, **On Request** meetings cost \$100 per meeting.

Superform **Online** Installation Procedure

The Superform **Online** program is available free of charge to download from our website at www.everyrace.com. You will need to log in to everyrace.com using your registration details (registration is free). Once logged in select "Superform" from the menu down the left hand side then select "Superform Online". Follow the instructions to download and install the latest version.

Superform **Online** Main Window

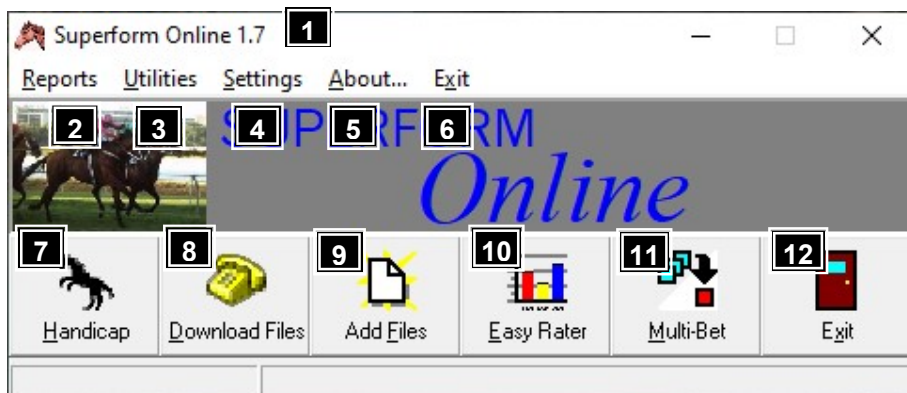

Overview

The main window provides the complete functionality of the Superform **Online** handicapping software. The Superform **Online** window consists of 5 menu items and 6 icon buttons, all of which are discussed below.

Action

Double click the <Superform Online> icon on your desktop.

The following Superform **Online** main windows will be displayed.

Features, Functions and Operation

1	Title bar - Shows the current version.	Page 6
2	Reports menu - This option allows you to examine reports for the Model, ERA, Trainer and Insider.	Page 6
3	Utilities menu - Provides the functions to edit your Special Horses file (blackbook), Update your own jockey ratings, delete unwanted meetings, archive meetings for future reference and check the integrity of the	Page 16

	Superform Online database.	
4	Settings menu - Sets preferences for all meetings so that certain options will always become the default. Set defaults for downloading files and allows the user to customise their own form guide.	Page 25
5	About menu – Displays the About Superform Online window showing the version number and a link to the website www.everyrace.com .	
6	Exit menu - Click on Exit to close Superform Online .	
7	Handicap button - This is the heart of the Superform Online system. This allows you to handicap races and analyse form, as well as perform other functions.	Page 29
8	Download Files button – This option is used to download files from the internet.	Page 52
9	Add Files button - Used to add files to the database after downloading.	Page 55
10	Easy Rater button - This option allows you to examine and manipulate the Superform Model Report.	Page 56
11	Multi-Bet button - This function allows the calculation and analysis of trifectas, quinellas and doubles.	Page 60
12	Exit button - Click on Exit to close Superform Online .	

Superform **Online**

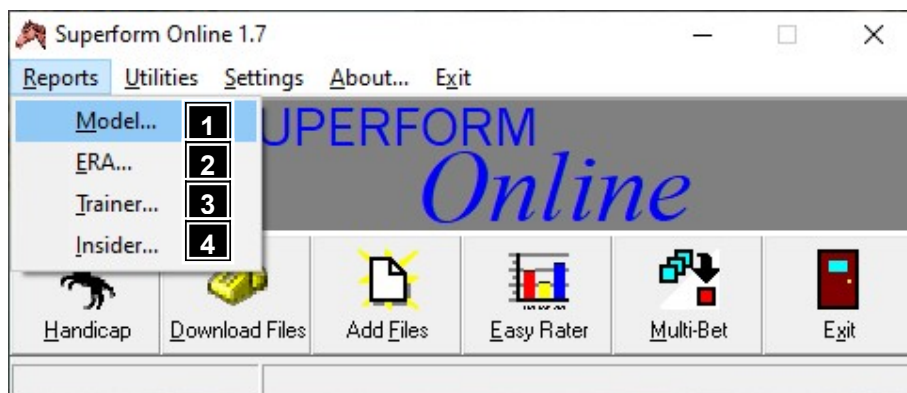

Reports

Overview

Superform **Online** provides a number of very useful and informative supplementary reports designed to aid the handicapping decision. There are four reports available, Model, ERA, Trainer and Insider.

Action

Select <Reports> from the Superform **Online** menu.

Features, Functions and Operation

1	Model menu - Provides a mathematical overview of 12 racing factors.	Page 6
2	ERA menu - Expected Ratings Assessment (ERA) provides a relative assessment of each runner's chances based on their revealed form over the last 12 months.	Page 9
3	Trainer menu - The Trainer Report looks at identifying key switches which may reveal a trainer's true intentions.	Page 12
4	Insider menu - This facility identifies horses that are worth noting. Not currently used.	Page 14

Superform **Online**

Reports - Model

Overview

The Model Report is a very useful tool in handicapping as it gives a feel for the race. This handicapping aid is the result of several years research designed primarily to locate and isolate the most common factors that all winners seem to possess.

Part of our research effort was also devoted to developing new methods of handicapping using the Superform ratings. What we were looking for was a framework within which one could view a race from several different angles. In short, we wanted to take the basic Superform method of handicapping and supplement it with other innovative methods.

The end result of our research can be found in the Superform **Online** Mathematical Model Ratings Report. More commonly they are just referred as the Models.

At the conclusion of our research we had isolated seven different methods of rating a field that seemed to be significant in one way or another. These are explained below.

We also sought a way of combining various quantitative assessments into a single ranking which would enable the Superform **Online** Model report user to see at a glance which of the runners had the strongest chance. This is where the complex mathematical modelling came in and we used Multiple Linear Regression techniques to produce the model rankings.

The individual rankings listed under the model columns MOD1 and MOD2 are the result of applying a mathematical regression equation to relevant factors contained in each horse's form for the forthcoming race.

As a general rule you might find it useful to look first at the figures in the two model columns (MOD1 and MOD2). You may notice that there is a significant difference between rankings for horses in these two columns. This is normal divergence and is one of the main reasons for having two separate mathematical models that reflect the different aspects of a horse's form.

Having said this, if you look across the columns you can see that there does seem to be only a few strong chances. These are the horses you can concentrate on during your pre-race analysis. If a horse does not rate prominently on any of the performance rating columns then the chance of it figuring in your final selections is minimal.

Another important use for the Superform **Online** Mathematical Model Ratings Report is in Multiple Betting. You will find it to be an invaluable aid in fining down the chances to include in your trifectas, daily doubles and quinellas.

Action

Select <Reports/Model> from the Superform **Online** menu.

Features, Functions and Operation

1	Select a meeting - Select a meeting by clicking on the name of the meeting from the Meeting list box 1. All races for that meeting will be displayed in the Race list box 2. The Model Report for race 1 for the selected meeting will be displayed in the Model Report table 4.	
2	Select a race - Select a race by clicking on the race name displayed in the Race list box 2. The Model Report for the selected race will be displayed in the Model Report table 4.	
3	Race header - The race header displays information about the currently selected race.	
4	Model Report table - The body of the Model Report, contains the rankings for each of the 12 assessments. Each column of the Model Report can be sorted by simply clicking on the heading. The heading in red is the	Page 8

	currently sorted heading. This will quickly allow you to see which the more dominant runners for each factor are.	
5	Save button - Save the Model if any changes have been made.	
6	Print button - Print models	Page 8
7	Scratch button - To scratch a runner from the Model Report click on the runner to be scratched. Click the Scratch button. A red line will be drawn through the entire row for that runner. The Model Report columns will be re-ranked when any runner is scratched. To unscratch runners highlight the runner and click the scratch button.	
8	Close button - Clicking the Close button will return you to the Superform Online main window.	

Superform **Online**

Reports – Model – Model Report table

Mod1	Output ranking derived from Multiple Linear Regression techniques based on a horse's "career" record. The inputs to this mathematical model include such vital career statistics as win percentage ratio, "in the money" percentage ratio, prize money percentage ratio, strike rate at the distance and recent form index. These elements are balanced by the traditional quantitative aspects based on weight rating analysis.
Mod2	Output ranking derived from Mathematical Linear Regression techniques but based solely on weight ratings. Our research shows that weight ratings when considered as a "group" were, in fact, a more important indicator of the outcome of any race than any one particular rating method on its own. The regression mathematical equation combines each of the ratings output into a single ranking which, in scientific terms, is more accurate. The rating inputs include the improvement bias rating (IMP), distance bias rating (DIS), ONLINE Handicapping Screen (OHS), this campaign (CAMP), Expected Peak (ExPk) and Ability (Abil) ratings.
Imp	This rating methodology is biased towards the improvement a horse could be expected to make. Current form is always used as a bias for predicting this improvement. Expected peak ratings are used to assist in allocating improvement bonuses for horses who have not yet reached their expected peak, however the size of the bonus is controlled by current form. For horses who have reached a new peak, improvement is based on the form cycle and the incremented improvement that the horse had made going into the forthcoming race.
Dist	It has long been a recognised fact that some horses perform better in specific distance ranges. This rating therefore has a bias towards a horse's performance within a +/- 10% of distance of the upcoming race.
OHS	The rating column reflects the ranked order based on the odds initially displayed on the Handicapping window.
Camp	This column shows how each contender ranks on the best rating it has returned in its current campaign. Sometimes a horse can suffer a lapse of form during a preparation and this rating can highlight a possible "unexpected" improver (otherwise known as a "form reversal" horse).
Ex Pk	This column ranks the whole field on the horse's expected peak ratings from their last preparation.
Ability	This rating is referred to as the ABILITY rating. The aim of the handicapping process in this instance is to produce a ranking based on the revealed ability of each runner. The computer searches back through each horse's form for the last 12 months and then select only the placed runs for further analysis. By confining the analysis to just the placed runs this method largely overcomes the "fluke rating" which is so often occurs in conventional methods. Once the computer has selected the "ability" rating from the last 12 months of form, a series of bonuses and penalties are applied. These reflect the horse's current form cycle, performance at the distance of today's race, consistency, class of race and overall performance. The ABILITY rating is a very complex rating but it has been found to be a most useful predictor.
Class	This is a pure "class" rating. The computer scans each horse's record and re-adjusts the conventional weight ratings to straight class ratings. That is, only the class of race together with weight carried over the limit and the beaten margin are fed into the calculation.
Wet	Sometimes there is considerable conflict between soft and heavy ratings. The "Wet" column ranking selects the best weight for age adjusted rating registered on either a soft or heavy track. This often gives a more meaningful ranking than either the "Soft" or "Heavy" ranking in isolation.
Soft	This column shows the horse's rank on their previous best form on soft going tracks, adjusted for weight for age improvement.
Hvy	This column shows the horse's rank on their previous best form on heavy going tracks, adjusted for weight for age improvement.

Superform Online

Reports - ERA

Overview

The ERA (Expected Ratings Analysis) Report is a unique way to obtain a rating overview of a race. Specifically, it will show you in an easy to analyse manner how each horse rated (relative to another), on each race it has run over the last twelve months. Across the top of the ERA Report the horses are listed, along with their TAB number and jockey. The ERA Report is broken up into weekly intervals for the previous 12 months. This information is displayed down the left hand side of the ERA Report. The body of the table shows a figure that the horse must improve by, on that run, to win the race. The way in which the ERA Report is produced is as follows:

The Predicted Rating: The first step in producing the ERA Report is to estimate what QTPR (Quality –adjusted True Performance Rating) rating each runner would return should it, in fact, win the race under review. The estimation of a QTPR as found in the weekly Superform results is not quite as difficult as you might imagine. To do it we first estimate the strength of the field (that gives us a Q figure). Using the pre-race “Q” figure we modify the Basic Class Figure (BCF) for the race. This then gives us the Final Class Figure (FCF) that is used to calculate the QTPR for each of the runners in the forthcoming race. The FCF is adjusted for weight above the limit and the rider rating. The resultant figure is an estimated QTPR for every runner.

The Expected Rating: Once the estimated QTPR has been calculated it is time to pose the following question “Given that we have predicted what rating the horse is likely to return should it win the race, how much better or worse has it run in the past, relative to that rating?” We answer this question by looking at every race run by the galloper in the last 12 months. We take the Weight For Age adjusted rating for each of these runs and “assume” that it is the actual base rating for the forthcoming race. This “base rating” is adjusted by the weight to be carried and the appropriate rider rating...in exactly the same way as if the

rating has been the best of its last three runs and chosen as the “normal” base run rating. Now we compare each of these “expected ratings” to the “predicted QTPR”. The difference between the “expected rating” and the “predicted rating” is the figure shown in the body of the ERA Report.

It should be noted that we make three further adjustments to each horse’s “expected” ratings before they are compared to its “predicted rating”. First, we give a bonus where the jockey who rode on the “base run” is a non-winner on the horse and is to be replaced by a rider who has won on the horse. Second, there is an additional bonus if the new rider is one of the very top riders. Third, a penalty is imposed if the horse has not won in the last twelve months.

An example: Suppose the “predicted” QTPR for a galloper was 60. If it then had expected ratings of 57, 58.5, 63 and 56 as its only four runs in the last twelve months. Its ERA figures in the ERA body would be –3.0, –1.5, +3.0 and –4.0. As the higher figure, the better figure, the +3.0 difference shows which of its four starts has produced the best effort. If no other horse had a higher rating than +3.0, then this particular horse would be the “best performed horse” in the last 12 months.

The Distance Indicator: To highlight those runs which are nearest to the distance of the upcoming race, we place an * (asterisk) next to the ERA figure. This * indicates that the race was within +/- 10% of the distance of the forthcoming race. We personally place considerable importance on this indicator and place higher reliance on those ERA figures which we have the *.

As you can see, the ERA Report provides a unique overview of a complete year’s form of every runner in the forthcoming race. The ERA Report is a very useful tool in pre-race analysis because never before was it possible to compare horses to one another in such a concise and comprehensive format.

Action

Select <Reports/ERA> from the Superform **Online** menu.

Features, Functions and Operation

1	Select a meeting - Select a meeting by clicking on the name of the meeting from the Meeting list box 1. All races for that meeting will be displayed in the Race list box 2. The ERA Report for race 1 for the selected meeting will be displayed in the ERA Report table 5.	
2	Select a race - Select a race by clicking on the race name displayed in the Race list box 2. The ERA Report for the selected race will be displayed in the ERA Report table 5.	
3	Compress ERA Report - The Compress ERA Report check box reduces the column width for each runner. This enables more runners to be displayed within the ERA Report dialog box 5. The runner's name and jockey can be shown in full by running the mouse pointer over the displayed portion of the runner's name or jockey	
4	Race header - The race header displays information about the currently selected race.	

5	ERA Report table - The body of the ERA Report. Horse names, TAB numbers and jockeys are displayed left to right across the top of ERA table. The two left most columns display the number of days, the week number and the date. The body of the ERA Report displays a figure that can be plus or minus. The figure is placed in the cell which matches closest to the date of the actual race run. A minus figure means the runner must improve by the figure displayed relative to tomorrow's race. A plus figure means the run is superior relative to tomorrow's race. An * next to a rating means the distance of the race was within 10% of tomorrow's.

Reports – ERA - Print

Overview

The Print function prints the ERA reports. The ERA report for the whole meeting, the current race or selected races can be printed. This selection is made from the following window.

Print Meeting

Race Range:

☒ All

☐ Current

☐ Range:

Enter race number and/or race ranges separated by commas. e.g. 1,2,3,1-5

☒ Don't split races across pages

Printer Setup... View... Cancel

Action

Select <Reports/ERA> from the Superform **Online** menu.

Click <Print> button on the ERA Report window to display the Print Meeting window above. Click <View> button to display the

ERA reports that can be printed. To print the ERAs to the printer click the  button at the top of the window.

Overview

The trainer report is designed to give a quick insight into any significant switches planned by a trainer. In brief, a trainer attempts to manipulate only a few factors outside the stable. These are distances over which the horse is raced, the class in which it competes, the rider who is engaged, the time interval between runs, and to a lesser extent, the weight it will carry. (Items such as rider instructions have been ignored for there is no way we can anticipate what these might be).

The way in which the information in the Trainer Report is to be used is consistent with the fundamental principles of horse race handicapping. In order to make the information more readily meaningful the following explanation is provided.

Distance. There is no doubt that some trainers attempt to disguise the true form of a horse by running it over unsuitable distances. With the Trainer Report you can quickly see which horses are being stepped up or down in distance. You can then refer to their distance ability statistics provided through the Superform **Online** Handicapping & Form Analysis program. If it appears that the horse is returning to a more suitable distance it is worth spending extra time on an investigation of its overall chances in the forthcoming race.

Class. The movement of a horse up or down in class can often provide a clue to a trainer's intentions. What you are especially looking for is the drop down in class. For example, a move down from a Flying Handicap to a Mares race would be a positive sign for a mare previously proven against her own sex.

Timing. Some trainers like to win when their horses are fresh. Some race their horses into winning condition on the race track. Knowledge of trainer techniques will be developed by users of the Trainer Report as they constantly relate "freshness" and success to particular trainers. These TIMING indicators are also useful handicapping aids when one considers the number of sprinters who win within 3 runs after returning from a spell, and stayers and middle distance horses that win from their 3rd to 5th run from a spell.

Jockey. Without doubt the jockey factor is one of the key elements of the Trainer Report. Only second rate trainers deliberately switch to a poorly performed jockey when the money is down. A positive jockey change is definitely an important indicator of stable intentions. Almost as reliable is a switch to a "lesser" jockey when the horse is not fancied. There are more exceptions to this latter situation and it pays to develop knowledge of jockey-trainer relationships. Jockey statistics included in the Trainer Report are very useful for they show the record of the expected Jockey on the horse. When you see a switch to a jockey with a good record on the horse it is not unnatural to expect some improvement.

Weight. Some trainers like to get weight off the horse's back when the commission is to be launched. On the other hand there are many top trainers who are quite unconcerned about the horse going up 2 to 3kg. The fact that a horse is going up 2 or 3 kilograms in weight should not be considered negative. However, big weight shifts 4+ kilograms are negative. Similarly, it is worth noting those horses that are dropping sharply in weight. The Trainer Report makes these comparisons easy.

Action

Select <Reports/Trainer> from the Superform **Online** menu.

Features, Functions and Operation

1	Select a meeting - Select a meeting by clicking on the name of the meeting from the Meeting list box 1 . All races for that meeting will be displayed in the Race list box 2 . The Trainer Report for race 1 for the selected meeting will be displayed in the Trainer Report table 4 .	
2	Select a race - Select a race by clicking on the race name displayed in the Race list box 2 . The Trainer Report for the selected race will be displayed in the Trainer Report table 4 .	
3	Race header - The race header displays information about the currently selected race.	
4	Trainer Report table - The body of the Trainer's Report contains a number of columns which are defined here. [Tn] – TAB number. [Form] – This is the form of the horse at its last four starts. ('x' indicates a spell). [Hname] – The name of the horse. [Trainer] – 4 digit trainer code, which expands to full name when the mouse pointer is placed over the trainer's code. [Dst2] – Distance runner raced over 2 starts back. [Dst1] – Distance runner raced over last start. [Clss2] – Class of race runner raced two starts back. [Clss1] – Class of race runner raced last start. [FU] - Number of race starts this preparation either from a let-up signified by the letter "L", or from a spell, signified by the letter "S", "FU" indicates a first up. [DLR] - Days since last run. [Jock 2] – 3 digit code for jockey who rode the runner two starts back. Code expands to full name when the mouse pointer is placed over the 3 digit jockey code. [Jock 1] – Jockey who rode the runner last start. [Jockey] - The name of the jockey who is engaged to ride the runner this start. [W] - Number of wins of jockey engaged today has previously recorded on this runner. [P] - Number of placings. [S] - Number of starts. [Wg1] - Weight carried last start. [Wght] – Handicapped weight this race. [WDif] - The weight difference between <Wght> and <Wg1> eg <Wght> - <Wg1> = <WDif>.

Superform *Online* Reports - Insider

Please note Insider Reports are currently not provided.

Overview

The Insider Report function is only available to users who have downloaded the Insider Report files. The insider report lists horses under one of the following categories

- **Future Plans** - The future plans of some of Australasia's capable horse.
- **The Sick List** - A report of injuries suffered during the course of racing, training mishaps, injuries at the barriers etc.
- **Worth Noting** – Horses identified as being set for upcoming races, trainer intentions and possible starts.
- **Watch Busters** – Horses which posted class/race or track record times.
- **Firm Is Best** – Horses which stable sources indicate don't appreciate the wet.
- **On The Other Hand** – Horses which stable sources indicate do like the wet.
- **Talking Times** – Horses which have run fast times and have potential to reproduce the effort.

Action

Select <Reports/ERA> from the Superform *Online* menu.

Utilities – Jockey Ratings

Overview

The Jockey Ratings facility allows the user to enter your own jockey ratings. For your own jockey ratings to take effect you will need to select 'Use own jockey ratings' in <Settings/Preferences>.

Action

Select <Utilities/Jockey Ratings> from the Superform **Online** menu.

Features, Functions and Operation

1	Jockey search field – Type in the name of the jockey to search for. The search is dynamic and displays all jockeys that contain the text in the 'Jockey search' field.	
2	Jockey list – A list of all the jockeys in Superform Online .	
3	Metropolitan rating and allowance – Displays Superform Online's rating and allowance for metropolitan tracks for the current jockey selected. Your own rating and allowance can be typed in for this jockey. If the 'Own rating' is 0.0 then the Online rating will be used even if 'Use own jockey rating' has been checked on the 'Preferences' window.	
4	Provincial/Country rating and allowance – Same as metropolitan above but applies to provincial and country tracks only.	
5	Save button – Press this button to save any changes made to the current jockey. Make sure to save changes before moving onto another jockey or closing the window.	
6	Close button – Press this button to close the window.	

Superform Online

Utilities – Delete Meetings

Overview

The Delete Meetings function allows meetings to be deleted that are no longer needed. A single meeting can be deleted or all meetings can be deleted. The more meetings in Superform **Online** the more time it takes to search for information, so deleting meetings when they are no longer required increases the performance of Superform **Online**.

Action

Select <Utilities/Delete Meetings> from the Superform **Online** menu.

Features, Functions and Operation

1	Meeting list - List of all meetings in Superform Online .	
2	Delete button - Deletes the selected meeting.	
3	Delete All button - Deletes all meetings in Superform Online . A confirmation window will be displayed to confirm the deletion of all meetings in Superform Online .	
4	Close button - Close the Delete Meeting window.	

Superform *Online*

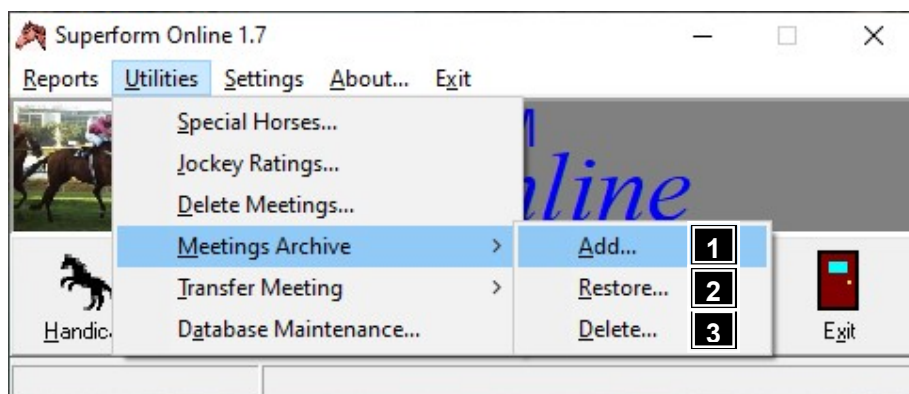

Utilities - Meetings Archive

Overview

An archive facility is provided to enable users to archive their old meetings which can be restored for future reference. If a meeting is no longer needed it can be deleted from the archive. Meetings do not need to be archived unless the user is genuinely interested in using old meeting information. It is better to delete the meeting if it is no longer required to free up the list of meetings in Superform **Online**.

Action

Select <Utilities/Meetings Archive> from the main menu.

Features, Functions and Operation

1	Add menu - Allows a meeting to be added to the archive.	Page 22
2	Restore menu - Allows a meeting to be restored from the archive.	Page 22
3	Delete menu - Allows a meeting to be deleted from the archive.	Page 23

Superform *Online*

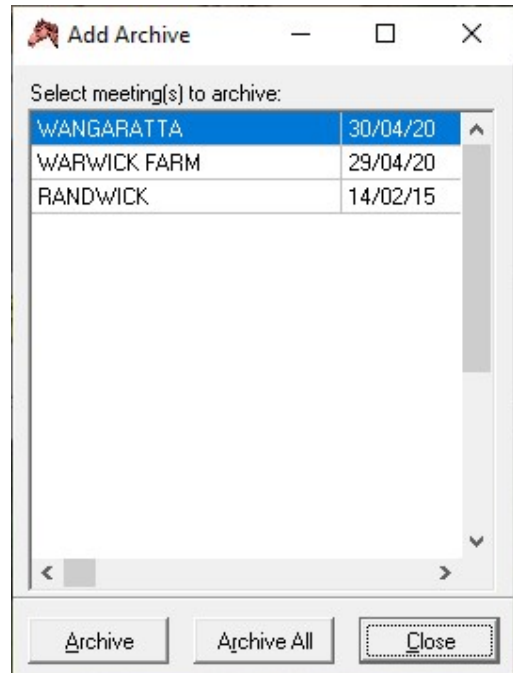

Utilities – Meetings Archive – Add

Overview

Displays a list of all meetings currently in Superform *Online*. Select a meeting to archive or select <Archive All> to archive all meetings currently on the computer. Once a meeting is archived it no longer appears in Superform *Online* until it has been restored.

Action

Select <Utilities/Meetings Archive/Add> from the Superform *Online* menu.

Superform *Online*

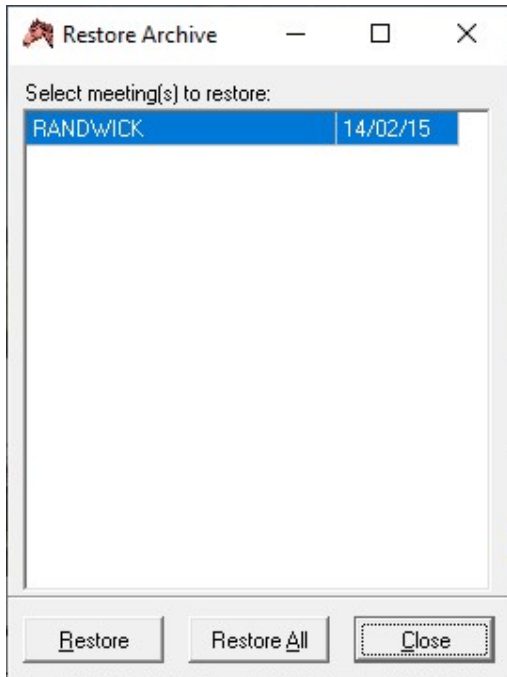

Utilities - Meetings Archive – Restore

Overview

Displays a list of all meetings currently archived. Select a meeting to restore or select <Restore All> to restore all meetings previously archived.

Action

Select <Utilities/Meetings Archive/Restore> from the Superform **Online** menu.

Superform **Online**

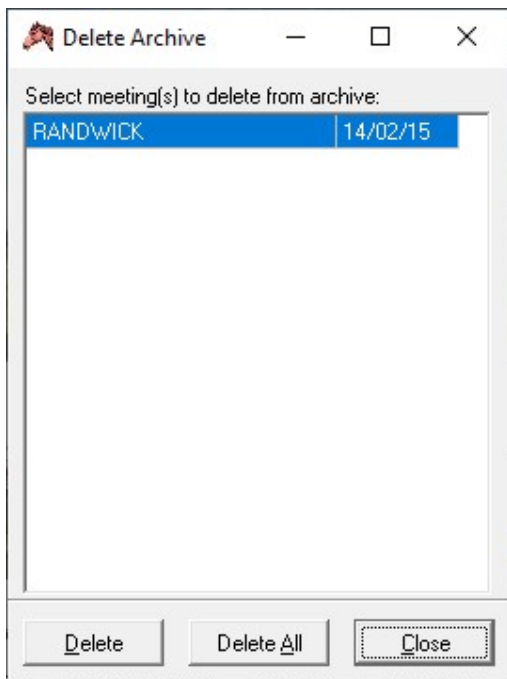

Utilities - Meetings Archive - Delete

Overview

Displays a list of all meetings currently archived. Select a meeting to delete or select <Delete All> to delete all meetings previously archived. Once a meeting has been deleted from the archive it can no longer be restored.

Action

Select <Utilities/Meetings Archive/Restore> from the Superform **Online** menu.

Superform **Online**

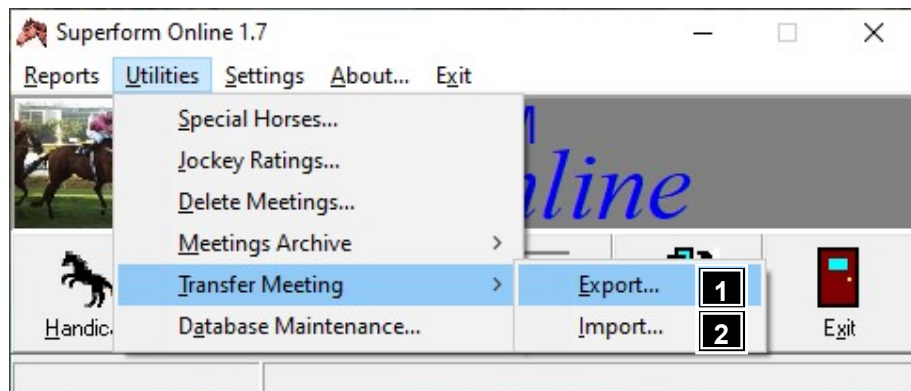

Utilities – Transfer Meeting

Overview

Allows meetings to be transferred (copied) from one computer to another via an external or USB drive. Transferring meetings involves the following steps, copy the appropriate meetings to the external or USB drive, take the drive to another computer and copy the meetings from the drive onto the other computer. Note that Superform **Online** must be installed on both computers.

Action

Select <Utilities/Transfer Meeting> from the main menu.

Features, Functions and Operation

1	Export menu – Allows meetings to be copied from Superform Online to an external or USB drive	Page 24
2	Import menu – Allows meetings to be copied from an external or USB drive to Superform Online .	Page 25

Superform **Online**

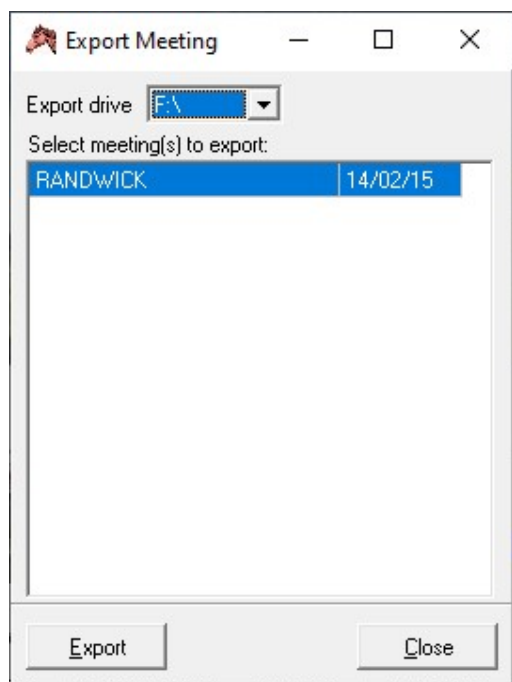

Utilities – Transfer Meeting – Export

Overview

Displays a list of all meetings currently in Superform **Online**. Select a meeting to be copied to the selected external or USB drive.

Action

Select <Utilities/Transfer Meeting/Export> from the Superform **Online** menu.

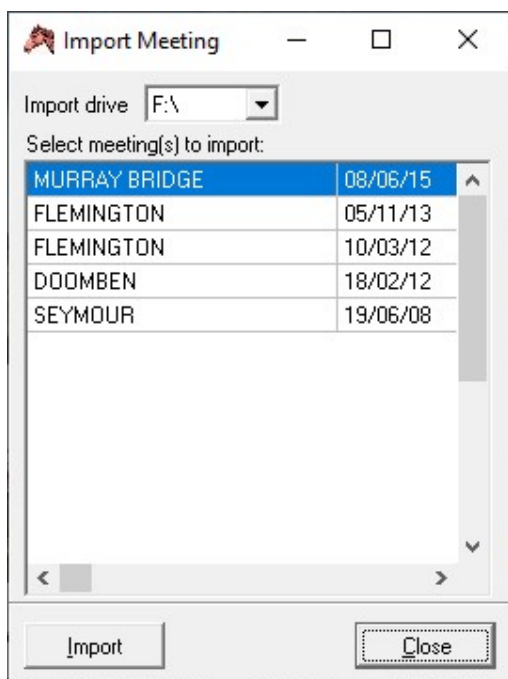

Utilities – Transfer Meeting – Import

Overview

Displays a list of all meetings on the selected external or USB import drive. Select a meeting to be copied from the drive to Superform *Online*.

Action

Select <Utilities/Transfer Meeting/Import> from the Superform *Online* menu.

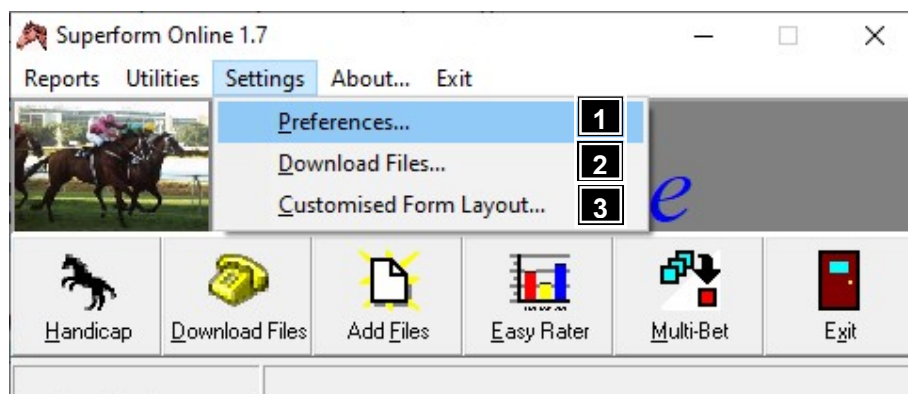

Settings

Overview

Allows preferences to be set system wide so that certain options will always become the default. Also allows defaults to be set for downloading files.

Action

Select <Settings> from the Superform *Online* menu.

Features, Functions and Operation

1 Preferences menu - Allows preferences to be set system wide.

2	Download Files menu - Allows preferences for downloading files to be changed.	Page 27
3	Customised Form Layout menu - Allows the setup of your own form guide layout.	Page 27

Superform *Online*

Settings - Preferences

Overview

We have attempted to make Superform *Online* as flexible as possible. We know that people handicap races in many different ways, and use different criteria to handicap. We have therefore added a preferences facility for some options so that each subscriber can, if they so wish, tailor those options to default to the way that the subscriber normally does things.

The options, once saved, will be automatically used every time you use Superform *Online*.

Action

Select <Settings/Preferences> from the Superform *Online* menu.

Features, Functions and Operation

1	Default Form Layout – The default used when displaying the form for a horse. Normal is a concise form guide, expanded is the regular layout and custom is a user defined form guide. The custom form layout is set-up under <Settings/Customised Form Layout>.	
2	Use aggressive price lines - The default for using aggressive price lines is set by this option. Tick the box to use aggressive price lines when handicapping a meeting or leave the box blank to use a more conservative price line. The default can be overridden on the main handicapping window.	
3	Trainer report in old format – Select this option to display the Trainer Report in the old MS-DOS style format. By default this option is not checked.	
4	Display filter screen – Select this option to display the filter window when form is selected from the main handicapping screen. By default this option is not checked.	
5	Don't split races when printing – Select this option to keep races together when printing as the default. This option can be overridden each time a race is printed. By default this option is checked,	
6	Use decimal odds – Select this option to displays odds as decimals. By default this option is checked,	

7	Update barrier position – Select this option to adjust barrier positions after scratchings i.e. all runners outside the scratched runner move in by one. The barrier adjustment is also modified to reflect the new barrier. By default this option is not checked.	
8	Automatic download of other files – If this option is checked the latest course, jockey and trainer files are downloaded monthly. By default this option is checked.	
9	Use own jockey ratings – If this option is checked Superform Online will use your own jockey ratings if they are available otherwise it will use Superform Online ratings. If this option is unchecked Superform Online jockey ratings will be used. To change your jockey ratings select <Utilities/Jockey Ratings> from the main menu. By default this option is unchecked.	
10	Display SOT with track rating – If this option is checked then a numerical rating is displayed alongside the SOT in previous form. By default this option is checked.	
11	Alternate SOT filter – Select this option to be able to filter previous form using the numerical SOT rating. By default this option is not checked.	
12	Market level field - The default market level can be entered in the <Market level> field. The default can be overridden on the main handicapping window.	
13	Takeout figure field – This is the default value used when the <Market> button is selected from the main handicapping window.	
14	Ok button - Accept the changes and closes the Preferences window.	
15	Cancel button - Closes Preferences window ignoring any changes.	

Superform **Online**

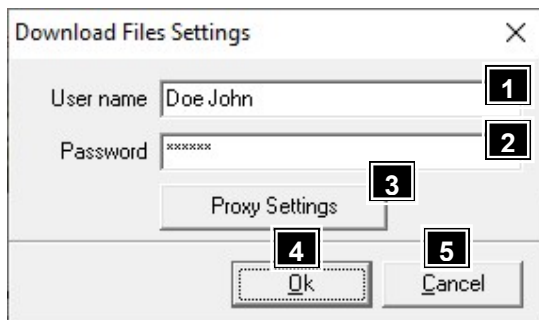

Settings – Download Files

Overview

This function allows you to enter your login details enabling you to access data files from the internet.

Action

Select <Settings/Download Files> from the Superform **Online** menu.

Features, Functions and Operation

1	User name field – Enter your username supplied by SuccessAbility.	
2	Password field - Enter your password supplied by SuccessAbility.	
3	Proxy Settings button – Set-up a proxy if it's required to access the internet. Note: most users will not need to use this option.	
4	Ok button – Accept the changes and close the Download Files Settings window.	
5	Cancel button – Ignore any changes and return to Superform Online main window.	

Superform **Online**

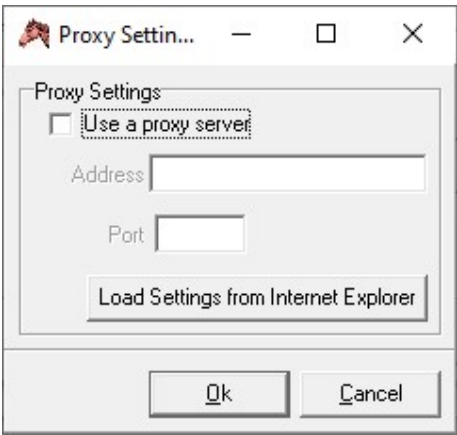

Settings – Download Files - Proxy Settings

Overview

The proxy settings need to be set up correctly to allow files to be downloaded. If you are unsure of the settings press the <Load Settings From Internet Explorer> button to fill in the values.

Action

Select <Settings/Download Files> from the main Superform **Online** window, then press the <Proxy Settings> button

Superform *Online*

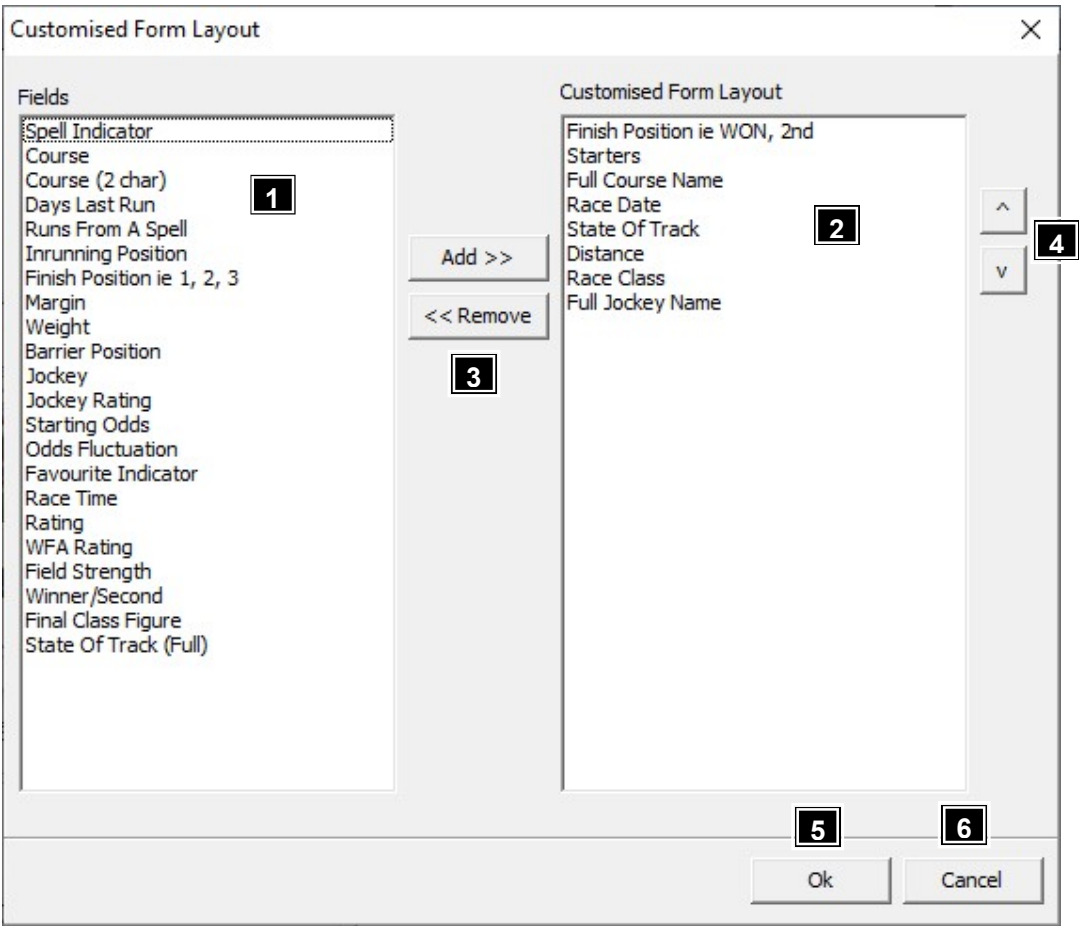

Settings - Customised Form Layout

Overview

The Customised Form Layout window allows a customised form guide to be set-up. To enable the customised form guide select <Settings/Preferences> from the main menu and select <Custom>

Action

Select <Settings/Customised Form Layout> from the Superform **Online** menu.

Features, Functions and Operation

1	Fields list – List of fields that can be displayed in the customised form guide.	
2	Customised Form Layout list – Current layout of customised form guide.	

3	Add / Remove buttons – Add or remove field from the customised form layout.	
4	Up / Down buttons – Used to reorder the currently selected field in the customised form layout.	
5	Ok button - Accept the changes and closes the Customised Form Layout window.	
6	Cancel button - Closes Customised Form Layout window ignoring any changes.	

Superform *Online*

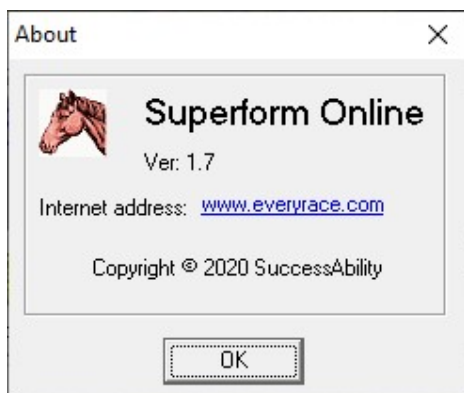

About

Overview

The About window displays the current version and a link to our website.

Action

Select <About> from the main Superform *Online* window.

Superform *Online*

Handicap

Overview

The Handicap window is the heart of the Superform *Online* program. The Handicap window includes a number of functions including displaying up to the last 40 starts for each runner, change jockeys, scratch horses and display a number of reports.

Action

Select <Handicap> from the main Superform *Online* window.

Handicap Field Details

Brow: **26** **27**

Features, Functions and Operation

1	Select a meeting - Click on the drop down arrow to display all current meetings. Select a meeting by clicking on the meeting line. Initially the meeting list will be short, but once you have started downloading meetings the list will build up. To limit the number of meetings in this list, meetings can be deleted or archived by using <Utilities/Delete Meetings> or <Utilities/Meetings Archive> on the Superform Online main menu.	
2	Select a race - Click on the drop down arrow to display all current races. Select a race by clicking on the race line. If you have saved a race then the letter "s" appears to the left of the race line. If you select this race and you have saved it previously, then you will be presented with the Saved Race Option box. You will be given the option to either load the data that was previously saved, or you can load the race as was originally downloaded. In addition the <Load> 5 button allows you to revert to either a saved version or original version. See 5 following for a full description of the <Load> function.	
3	Aggressive odds check box - Toggles aggressive odds line, where the more favoured runners have their prices tightened at the expense of less favoured runners. Own jockey ratings check box - If checked will use you own jockey ratings on the handicapping screen. To create your own jockey ratings select <Utilities/Jockey Ratings> on the Superform Online main menu.	
4	Market Level Indicator - Displays the percentage book value that the prices in the odds column of the Handicapping table 23 has been set to. You can reset this level by clicking the Market button 17 .	
5	Load button - If a race has been previously saved indicated by the letter "s" to the left of the race line 2 . You have the option to reload either the saved version or the original version of the race file. This facility is quite important as you may have made changes to the currently loaded race file and now wish to revert back to the original version.	
6	Save button - Will save the current race file with any changes.	
7	Delete button - Deletes a race that has been previously saved. Note though the original version of the race is not deleted.	
8	Close button - Closes the handicapping function and returns to the Superform Online main window.	
9	All Form button - Displays previous form for all horses in the current race.	Page 31
10	Form button - Displays previous form for the currently selected horse. Double clicking a horse will also display the form lines for that horse.	Page 37
11	Edit button - You can edit the basic handicapping screen values using this function. Click on any runner or a specific runner in the body of the main window 25 . The runner's data line will be highlighted in blue. Clicking the Edit button will place a dotted line around the Base rating data for the horse highlighted. You can then edit that data. You can only edit data in the columns [Base] [Form] [Cond] [Cons] [BP Adj] [Own] [Joc Rat] [J Allow]. Once in Edit mode you can edit any of the previous mentioned data fields either by clicking in any field	

	for any runner or by using your cursor control keys. After a data field is edited the Final Rating (FR), Margin, Percent and Odds columns are automatically updated. When the Edit button is selected it will be replaced by a button labelled Browse. To exit the Edit function you click on the Browse button. Note – in Browse you are not able to change any value in the basic handicapping screen.	
12	Jockey button - Allows the jockey to be changed along with modification of respective jockey ratings and allowances.	Page 42
13	Scratch button - Scratches a runner. To scratch a horse, highlight the horse and click the <Scratch> button. A red line will be drawn through the runner's data line. Depending on the odds of the runner scratched the remaining runners will have their odds shortened. To unscratch a runner, highlight the scratched runner, and click the <Scratch> button.	
14	Statistics button - Displays wins/places/starts statistics by Course, Distance, Class and Track Condition for the current race being handicapped.	Page 43
15	Insider button - Highlights horses with insider reports for the current race being handicapped.	Page 14
16	Train Rpt button - Displays the Trainer Report for current race being handicapped.	Page 12
17	Market button - This function allows the book value (market percentage) for the race to be set. It is also possible to remove runners from the market, as against scratching them.	Page 45
18	Dutch button - Allows the race to be dutch bet by either staking a set amount or returning a set amount.	Page 45
19	Specials button - Examines your Specials horses to see whether any are running at the meeting being handicapped. To create your personalised list of special horses select <Utilities/Special Horses> on the Superform Online main menu.	Page 47
20	Model Rpt button - Displays the Model Report for current race being handicapped.	Page 6
21	BRR button - Displays the Base Run Ratings for current race being handicapped,	Page 47
22	Scr/Rider button - Displays a list of scratchings and jockey changes for the current meeting being handicapped.	Page 49
23	Print button - Print handicapping screen.	Page 50
24	Race Header - The race header displays information about the currently selected race.	
25	Handicapping table - The body of the handicapping screen displaying handicapping information about each runner in the currently selected race. A description of each column can be found on Page 51.	Page 51
26	Handicap tab - Displays main handicapping information.	
27	Field Details tab - Displays extra handicapping information that doesn't fit on the main handicapping tab. Additional information includes form figures for last six starts, jockey name, trainer name, weight allocated and barrier position.	

Superform **Online**

Handicap – All Form

Overview

All Form is a form look up facility on all the horses in the race. It allows you to use the multiple form options as you would in a single horse form look up.

Action

Select <Handicap> from the main Superform **Online** window.

Click <All Form> button on Handicap window to display All Form window below which is in the expanded form layout.

The <All Form> facility is not as comprehensive as the <Form> facility which is also available on the Handicap window ie the <All Form> function does not have the same degree of flexibility and analytical features as the <Form> function. The purpose of the <All Form> facility is to aid the fining down process. Each runner is displayed in the top window with their form displayed in the bottom window. The form displayed can be filtered ie parameters set which limit the form lines shown, but this filter is applied equally to every runner. This process allows initial assessments to be made with quick and easy interaction between all runners in the race for the purpose of allowing quick elimination of less qualified runners. The detailed analytical process is carried out through the <Form> process which has a very detailed filter allowing fine matters of judgment to be made.

Features, Functions and Operation

1	Race header - The race header displays information about the currently selected race.	
2	Main tab - Displays information about each runner. The information is presented in columns. [TAB] - The horse TAB number. [Name] - The horse's name. [Ag/Sx] - Age and sex of horse. [Wins] - Number of wins. [Pace] - Number of places. [Strts] - Number of starts. [W%] - Win percentage. [Wght] - Allocated weight. [BP] - Barrier position. [DLR] - Number of days to last start. [Jockey] - Name of jockey. [JRat] - A rating given to each jockey which measures his/her ability. [J Allow] - Overweight, or an allowance if claimed by an apprentice rider. [Trainer] - Name of trainer.	
3	Model tab - Displays model report for current race. Refer to <Reports/Model> on page 8 for an explanation of the Model Report.	Page 8
4	Rating tab - Displays ratings for current race. The ratings are from the handicap table.	Page 51
5	Filters tab - Displays the currently selected filters that are applied to the form lines in the form line table 9.	
6	Filters button - Displays the filters that can be applied to the form lines for each runner in the race.	Page 33
7	Print button - Print form lines for each runner in the race.	Page 50
8	Close button - Closes the All Form window and returns to the Handicap window.	
9	Form Line table - Displays the form lines for the current runner. Note - the form lines displayed are restricted based on the parameters set in the filters. A description of abridged form layout and the expanded form layout is on Page 37.	Page 37

10 Displayed Stats - Displays wins, seconds, thirds, race starts, win percentage and place percentage for the displayed form lines. Note – These statistics may differ from the career Win/Places/Starts for the runner as they are dependant on what filters are used.

Superform Online

Handicap – All Form – Filters tab

Overview

Displays the filters that have been applied to the form lines. These values can be changed by clicking the <Filters> button on the All Form window. These filters apply to all runners in the race.

Action

Select <Handicap> from the main Superform **Online** window.

Click <All Form> button on Handicap window to display All Form.

Select <Filters> tab to display the All Form window with the filters tab selected.

Displayed Stats: 2-1-2-15 WP%(13) PP%(33)

A tick to the left of the filter indicates that the filter is applied to the form lines. A red cross indicates that any form line that meets the filter's conditions is removed. In the window above all form lines on a soft track are removed. A grey cross indicates the filter is ignored.

1 Track Condition - Restrict form lines based on the track condition. A tick next to each of the four track conditions displays all form lines.

2 Form Layout - The lay out of the form whether it is Normal, Expanded or Custom.

3 Display barrier trials - A tick will include barrier trials in the form lines

4 Display stewards - A tick will include Steward reports in the form lines

5 Winning runs only - A tick will only display form lines where the horse won the race.

6	Jockey - Restrict form lines based on jockey. A tick next to <All jockeys> will display all form lines.	
7	Class - Restrict form lines based on the class of the race. A tick next to <All classes> will display all form lines.	
8	Course - Restrict form lines based on course. A tick next to <All courses> will display all form lines.	
9	Runs from a spell - Restrict form lines based on number of runs from a spell. A value of 3 will displays all form lines that are 3 runs from a spell as well as all lead up runs to the third run.	
10	Max odds - Restrict form lines based on starting price odds. Displays all form lines that are less than or equal to the value displayed in <Max odds>. A value of 1000 will display all form lines.	
11	Distance - Restrict form lines based on distance of race. Options include a minimum and maximum distance. A tick next to [+/- 10% of today's distance] only displays form lines that are within 10% of today's distance.	
12	Weight - Restrict form lines based on weight carried. Option allows a weight range to be specified. This range is then applied to each runner's allocated weight for today's race as a plus or minus figure. For example, for an allocated weight of 55.0Kg and range of less 4.0 and add 2.0, form lines will only be displayed where the weight carried is between 51.0kg (55.0-4.0) and 57.0kg (55.0+2.0) inclusive. A value of 99.0 <Less> and 99.0 <Add> will display all form lines.	
13	Days Since Last Run - Restrict form lines based on number of days since last run. Option allows a range to be specified. This range is then applied to days last start for each runner as a plus or minus figure. For example for days last run of 10 days and a range of less 2 and add 2 days, form lines will only be displayed where days last run is between 8 days (10 – 2) and 12 days (10 + 2) inclusive. A value of 9999 <Less> and 9999 <Add> will display all form lines.	
14	Field Strength - Restrict form lines to only display runs between a minimum and maximum field strength value.	

Superform *Online*

Handicap – All Form - Filters

Overview

There are 14 form line factors that can be set by use of the Filter Button. Some of the factors are selected by placing a tick in an adjacent check box. Removing the tick removes that filter option. Other factors allow numerical ranges to be set. The purpose of the filtering process is to limit the number of displayed form lines for a runner to those that are most relevant to your handicapping requirements. For example, if today's distance is over 1200 metres, displaying runs where the distance is say 2000 metres or more may be considered irrelevant. Placing a distance filter will mean those irrelevant runs are not displayed, providing a clearer relationship of those runs that are relevant.

All filters are inclusive. This means a form line must satisfy all filter factors eg say the distance filter is set to "1200m" and the track condition filter is set to "good". For the form line to be displayed it must be 1200 metres AND on a good track.

The form filter settings are race specific. They apply to all runners in the chosen race and are of a general nature. If you want to filter more specific data then you can do this through the individual runner filter accessed through the <Form> button on the Handicap screen.

Action

Select <Handicap> from the main Superform *Online* window.

Click < All Form> button on Handicap window.

Click <Filters> button on All Form window to display the Form Filter form below.

Features, Functions and Operation

1	Track Condition filter - Restrict the display of form lines based on track condition. A tick next to a track condition displays form lines for that track condition. Tick all track conditions to display all form lines.	
2	Display barrier trials filter - Ticking this filter will display all barrier trials for the runner.	
3	Display stewards filter - Ticking this filter will display all stewards reports for the runner.	
	Winning runs only filter - Restrict the display of form lines to winning runs only. Ticking this filter will only display form lines where the horse has won.	
5	Layout – The form can be displayed in one of three layouts – normal, expanded or custom. Normal is a concise form guide allowing each run to be printed on a single line of an A4 piece of paper. Expanded displays extra information in addition to the normal layout and custom is the user defined layout.	
6	Jockey filter - Restrict the display of form lines based on the jockey. To display all form lines for today's jockey tick <Today's Jockey>. Tick <All jockeys> to display all form lines.	
7	Class filter - Restrict the display of form lines based on the class of the race. The facility allows specific form lines or combinations of form lines depending on the options selected. More than one option can be selected. To tick a class in the list <All classes> must not be ticked. Tick <All classes> to display all form lines.	
8	Distance filter - Restrict the display of form lines based on the distance. A minimum and maximum distance must be entered. For example, to display all form lines 1600 metres or more enter 1600 in the <Minimum> field and 9999 in the <Maximum> field. Ticking <+/- 10% of today's distance> overrides the minimum and maximum distance values. 0 in the <Minimum> field and 9999 in the <Maximum> field will display all form lines.	
9	Weight filter - Restrict the display of form lines based on the weight carried. Values must be entered in both fields. This option allows a weight range to be specified. This range is then applied to each runner's allocated weight for today's race as a plus or minus figure. For example, for an allocated weight of 55.0Kg and range of less 4.0 and add 2.0, form lines will only be displayed where the weight carried is between 51.0kg (55.0-4.0) and 57.0kg (55.0+2.0) inclusive. A value of 99.0 <Less> and 99.0 <Add> will display all form lines.	
10	Days Since Last Run filter - Restrict the display of form lines based on the number of days since the last run. Values must be entered into both fields. This option allows a range to be specified. This range is then applied to days last start for each runner as a plus or minus figure. For example, for days last run of 10 days	

	and a range of less 2 and add 2 days, form lines will only be displayed where days last run is between 8 days (10 – 2) and 12 days (10 + 2) inclusive. A value of 9999 <Less> and 9999 <Add> will display all form lines	
11	Field Strength filter –Filter to only display runs between a minimum and maximum field strength value.	
12	Maximum Odds filter - Restrict the display of form lines based on the starting price odds. Form lines are displayed for starting price odds equal to or less than the value entered in the <Maximum odds> field.	
13	Runs from a spell filter - Restrict the display of form lines based on the number of runs from a spell. A value of 3 will displays all form lines that are 3 runs from a spell as well as all lead up runs to the third run.	
14	Course filter - Restrict the display of form lines based on the course. The form lines can be restricted to any of the metropolitan courses by ticking the corresponding filter. Any combination of filters can be ticked. For example, to display only Sydney and Melbourne metropolitan form lines tick <Syd Metro> and <Melb Metro>. To tick a course in the list <All courses> must not be ticked. Tick <All courses> to display all form lines.	
15	Save button - Saves the current filter settings as the default settings.	
16	Load button - Loads the previously saved filter settings	
17	Reset button - Resets all filters to a preset value. Clicking this button ensures that all form lines are displayed.	
18	Ok button - Accept the filter changes.	
19	Cancel button - Ignore any changes that have been made.	

Superform *Online*

Handicap – All Form - Print

Overview

The Print function prints the form lines for each horse in the current race. The form lines can be printed in either the expanded or abridged format. The number of runs to print for each runner is made from the following window.

A small dialog box titled "Number Of Runs" with a close button (X) in the top right corner. It contains a text field labeled "Runs to print" with the value "10" entered. Below the text field are two buttons: "Ok" and "Cancel".

Action

Select <Handicap> from the main Superform *Online* window.

Click <All Form> button on Handicap window to display All Form.

Click <Print> button on All Form window to display Number Of Runs window above.

Enter number of runs to print.

Click <Ok> to display Print Form window below.

To print the runs to the printer click the  button at the top of the window.

A screenshot of the "Print Form" window. The title bar says "Print Form". The menu bar includes "File", "Page", and "Zoom". The toolbar shows icons for file operations and a zoom slider set to 100.0%. The main content area displays race information for "WANGARATTA 30/04/20 6 KILLAWARRA KENNELS (BM58) 1590m Class: FMB-58 Lwt: 50.0". Below this, it lists details for horse 1, FERROCERIUM, including starts, jockey (JACK HILL), trainer (MS D WILLS), and various performance metrics. The bottom of the window shows a status bar with "Page 1 of 5" and a printer icon.

Handicap – All Form – Form Line table

Displays the form lines for the selected horse. Each piece of information is separated into columns. A more descriptive name of each column is displayed when the mouse pointer is moved over the column heading. The form lines can be displayed in an expanded or abridged format. Each column is described below in the order they appear in the expanded format,

Spell	An "S" indicates that this run is a first up run since a spell. And "L" indicates this run is the first run since a let-up. A spell is 63 days or more, a let-up is between 35 and 62 days.
Course	Four character course code (two character in abridged format) of the run. The full course name is displayed if the mouse pointer is moved over the four character course name.
Days Last Run	Number of days since the horse's previous run.
Runs From A Spell	Number of runs since the horse's last spell. First-up is 1 run from a spell
Date	Date of the run. An "s" after the date indicates the run was on a Saturday.
State Of Track	State of the track. "f" - firm, "g" - good, "s" – soft, "h" – heavy.
Distance	Distance of the race.
Class	Class of the race.
Starters	Number of starters in the race.
Leg Position	In running position.
Finish Position	Horse's finish position in the race. If the runner won the form line is coloured red. If the runner placed (2nd or 3rd) the form line is coloured green. If the runner is unplaced the form line is coloured black.
Margin	Margin to the winner in lengths. If the winner then the margin to the second place getter.
Weight	Weight carried by the horse.
Barrier Position	Barrier position in the race.
Jockey	Three character jockey code. The full jockey name is displayed if the mouse pointer is moved over the three character jockey name.
Jockey Rating	Rating of the jockey.
Odds Fluctuation	If there are 3 odds fluctuations the left odd is the opening price, middle odd is the mid price and last odd is the starting price. If there are 2 odds fluctuations the first odd is the opening price and the last odd is the starting price. If there is only one odd then it is the starting price. Abridged format only displays the starting price.
Favourite	An "F" indicates the horse was the starting price favourite.
Time	The race time returned by the runner.
Rating	The rating returned by the runner with no WFA adjustment.
WFA Rating	The rating returned by the runner with a WFA adjustment.
Field Strength	The Field Strength figure measures the difference between the quality of the field against which the horse raced last start and will confront in the forthcoming race. Bear in mind that races of exactly the same class can vary in strength. This means the level of competition the horse meeting in a Weight For Age (WFA) Group 2 tomorrow could be 1.5kg "tougher" than the WFA Group 2 field it raced at its last start and so on. In the Field Strength column +1.5 means tomorrow's field is 1.5kg stronger than the horse met last start. On the other hand, -2.0 means tomorrow's race is 2kg "weaker" than its last start, thereby making the task of the horse easier than might be expected given that it is racing in the "same" class.
Winner/ Second	If the horse didn't win the winner is displayed. If the horse won the horse that finished 2 nd is displayed.
Stewards Report	Stewards reports for the runner are coloured blue and appear below the form line that it belongs to. Stewards reports can be disabled through the filters.
Barrier Trials	Barrier trials are coloured aqua. Barrier trials can be disabled through the filters.

Handicap – Form

Overview

The Form function allows runner specific form information to be analysed and manipulated by use of the Form Filter. That is, filter settings for one runner do not apply to other runners in the race. Very specific and very detailed filter settings can be made. This contrasts with the All Form function which only allows race specific analysis or manipulation of form lines. That is, filter settings are applied to every runner in the race. Only general filter settings can be made.

Action

Select <Handicap> from the main Superform **Online** window.

Click <Form> button on Handicap window or double click the runner to display the form for that runner.

Features, Functions and Operation

1	Race header - The race header displays information about the currently selected race.	
2	Class/Lwt - Displays the class and limit weight of the race. "No" indicates this is a non claiming race.	
3	Horse - Displays details about the horse including TAB number, horse name, barrier position, weight, age and sex.	
4	Horse - Displays details about the horse including starts (wins, places, starts and win percentage), days since last run, jockey and trainer.	
5	Model Report - Displays the runner's rankings for each of the 12 Model Report factors. For a detailed description of the Model Report see Page 8.	Page 8
6	Filter button - Change the filters to customise the display of form lines.	Page 38
7	Rating button - Change the ratings for this horse.	Page 40
8	Print button - Print form lines for this runner.	Page 41
9	Close button - Close the Form window and return to the Handicap window.	
10	Form Line table - Displays the form lines for the current runner. Note - the form lines displayed are restricted based on the parameters set in the filters. A description of abridged form layout and the expanded form layout is on Page 37.	Page 37
11	Displayed Stats - Displays wins, seconds, thirds, race starts, win percentage and place percentage for the displayed form lines. Note - These statistics may differ from the career Win/Places/Starts for the runner.	

Superform Online

Handicap - Form - Filters

Overview

Clicking on the <Form> button produces the following Form Filters Window. There are 14 form line factors that can be set. Some of the factors are selected by placing a tick in an adjacent check box. Removing the tick removes that filter option. Other factors allow numerical ranges to be set. The purpose of the filtering process is to limit the number of displayed form lines for a runner to those that are most relevant to your handicapping requirements. For example, if today's distance is over 1200 metres, displaying runs where the distance is say 2000 metres or more may be considered irrelevant. Putting in place a distance filter will mean those irrelevant runs are not displayed, providing a clearer relationship between those runs that are relevant and today's race.

All filters are inclusive. This means a form line must satisfy all filter factors. For example, say the distance filter is set to "1200m" and the track condition filter is set to "good". For the form line to be displayed it must be 1200 metres AND on a good track.

Action

Select <Handicap> from the main Superform **Online** window.

Click <Form> button on Handicap window or double click the runner to display the Form Filter window below.
or
when the Form window is displayed click <Filters> button.

The screenshot shows the 'Form Filters' dialog box. At the top, it displays race information: 'WANGARATTA 30/04/20 6 KILLAWARRA KENNELS (1) 8) 159 Class: FMB-58 Lwt: 50.0'. Below this is the horse's name '1 FERROCERIUM' and its details: 'Age: 5 Sex: M Runs: 21 Weight: 61.5 BP: 4 DLR: 12'. The jockey and trainer information is 'Jockey: JACK HILL Rider O/A: 0.0 Jock Rating: 2.5 Trainer: MS D WILLS'. A table of model reports follows, with columns for Model1, Model2, Improve, Dist, DHS, Camp, ExPk, Abil, Class, Wet, Soft, and Heavy. The bottom section contains various filter controls: 'Track Condition' with checkboxes for Firm, Good, Soft, and Heavy track; 'Display barrier trials' and 'Display stewards' checkboxes; 'Layout' with radio buttons for Normal, Expanded, and Custom; 'Jockey' with a list box and 'All jockeys' checkbox; 'Class' with a list box and 'All classes' checkbox; 'Distance' with minimum and maximum value fields and a checkbox for '+/- 10% of today's distance'; 'Weight' with minimum and maximum value fields and a checkbox for 'Today's weight or more'; 'Days Since Last Run' with minimum and maximum value fields; 'Field Strength' with minimum and maximum value fields; 'Maximum odds' and 'Runs from spell' fields; and 'Course' with a list box and 'All courses' checkbox. At the bottom are buttons for 'Save', 'Load', 'Reset', 'OK', and 'Cancel'.

Features, Functions and Operation

1	Race Header - Displays race information.	
2	Class/Lwt - Displays the class and limit weight of the race. "No" indicates this is a non claiming race.	
3	Horse - Details about the horse including TAB number, age, sex, career starts, handicap weight, barrier position and number of days since last start.	
4	Jockey/Trainer - Displays jockey name, rider overweight/allowance (O/A), jockey rating (this is a rating Superform Online applies to every jockey which reflects that jockey's ability, and the trainer	
5	Model Report - Displays the runner's rankings for each of the 12 Model Report factors. For a detailed description of the Model Report see Page 8.	Page 8
6	Track Condition filter - Restrict the display of form lines based on track condition. A tick next to a track condition displays form lines for that track condition. Tick all track conditions to display all form lines.	
7	Display barrier trial filter - Ticking this filter will display barrier trials for the runner.	
8	Display stewards filter - Ticking this filter will display steward reports for the runner.	
9	Winning runs only filter - Restrict the display of form lines to winning runs only. Ticking this filter will only display form lines where the horse has won.	
10	Layout - The form can be displayed in one of three layouts - normal, expanded or custom. Normal is a	

	concise form guide allowing each run to be printed on a single line of an A4 piece of paper. Expanded displays extra information in addition to the normal layout and custom is the user defined layout.	
11	Jockey filter - Restrict the display of form lines based on the jockey. Jockeys in the list are all jockeys who have ridden the horse including today's jockey. To tick a jockey in the list <All jockeys> must not be ticked. Tick <All jockeys> to display all form lines.	
12	Class filter - Restrict the display of form lines based on the class of the race. Classes in the list are all classes the horse has run in including today's class. To tick a class in the list <All classes> must not be ticked. The form lines can be restricted to all classes equal to or stronger than today's class by ticking [=or> Class]. Tick <All classes> to display all form lines.	
13	Distance filter - Restrict the display of form lines based on the distance. A minimum and maximum distance must be entered. For example, to display all form lines 1600 metres or more enter 1600 in the <Minimum> field and 9999 in the <Maximum> field. Ticking [+/- 10% of today's distance] overrides the minimum and maximum distance values. 0 in the <Minimum> field and 9999 in the <Maximum> field will display all form lines.	
14	Weight filter - Restrict the display of form lines based on the weight carried. A minimum and maximum weight must be entered. For example, to display all form lines where the weight carried was 58.0kg or more enter 58.0 in the <Minimum> field and 99.9 in the <Maximum> field. Ticking <today's weight or more> overrides the minimum and maximum weight values. 0 in the <Minimum> field and 99.9 in the <Maximum> field will display all form lines.	
15	Days Since Last Run filter - Restrict the display of form lines based on the number of days since the last run. A minimum and maximum days since last run must be entered. 0 in the <Minimum> field and 9999 in the <Maximum> field will display all form lines.	
16	Field Strength filter - Filter to only display runs between a minimum and maximum field strength value.	
17	Maximum odds filter - Restrict the display of form lines based on the starting price odds. Form lines are displayed for starting price odds equal to or less than the value entered in the <Maximum odds> field.	
18	Runs from a spell filter - Restrict the display of form lines based on the number of runs from a spell. A value of 3 will display all form lines that are 3 runs from a spell as well as all lead up runs to the third run.	
19	Course filter - Restrict the display of form lines based on the course. Courses in the list are all courses where the horse has run including today's course. The form lines can be restricted to metropolitan courses by ticking the corresponding filter. To tick a course in the list <All courses> must not be ticked. Tick <All courses> to display all form lines.	
20	Save button - Saves the current filter settings as the default settings.	
21	Load button - Loads the previously saved filter settings.	
22	Reset button - Resets all filters to a preset value. Clicking this button ensures that all form lines are displayed.	
23	Ok button - Accept the filter changes, but doesn't save the settings as the default.	
24	Cancel button - Ignore any changes that have been made.

Features, Functions and Operation

1	Jockey search field - This field allows a certain jockey to be found quickly. For example, typing in "D" (no quotes) will move the pointer on the jockey list 2 down to the first jockey whose surname contains a "D", typing in "DY" will jump to the first jockey whose surname contains the text "DY".	
2	Jockey list - Displays a list of all the jockeys in Superform Online . Scroll down the list to find the right jockey. Double clicking will select the highlighted jockey with the rider rating and allowance in the respective fields. The latest jockey list can be download using download files.	
3	Metropolitan, Provincial/Country rating - Select either metropolitan or provincial/country depending on where the meeting is run.	
4	Online rating field - Every jockey in Superform Online has a jockey rating supplied. The jockey rating is a penalty, so the lower the rating the higher the ability of the jockey.	
5	Own rating field - This field allows you to enter your own jockey rating. 'Own jockey ratings' check box on main handicapping screen must be ticked to use your own ratings.	
6	Online allowance field - If the jockey has an allowance, enter their allowance in this field.	
7	Own allowance field - This field allows you to enter your own jockey allowance. 'Own jockey ratings' check box on main handicapping screen must be ticked to use your own allowance.	
8	Ok button - Accept the changes made.	
9	Cancel button - Cancel the changes made.	

Superform **Online**

Handicap – Statistics

Overview

Display the entire field's race statistics. Statistics are provided in two parts, "Course, Distance, Class" and "Track Condition". Both sets of statistics include information about a runner's wins, places, starts, win percentage and place percentage. The field can be sorted by any of the column headings so quick identification of the best performing runners in order can be made whether it by the raw number of wins or raw place strike rate.

Course, Distance, Class Statistics

This window shows statistics about the consistency of horses under certain race conditions which includes course, distance and class. Included in the consistency assessment is Superform **Online's** unique Good Run Index which is expressed as GR. This figure is calculated by the computer and is based on a horse's career record. It reflects the number of "good runs" that each horse has returned and is expressed as a percentage of the total career runs. A "good run" is classified as a run which the horse has either won, finished within 6 lengths if 2nd or 3rd or within 2 lengths if unplaced. A horse with a GR index of 50% or more can be considered as being consistent.

Track Condition Statistics

This statistics screen shows the performance of each runner by track condition. The last column on this screen is a specially calculated Wet Track index (WT). This index is calculated by the computer and is an indication of a horse's ability to handle "wet" tracks rather than a specific rain affected track classification. This index is calculated by considering runs on all wet tracks (that is, from soft to heavy) and counting the number of such runs in which the horse came within 3 lengths of the winner.

Action

Select <Handicap> from the main Superform **Online** window.
Click <Statistics> button on Handicap window to display Statistics window below.

Features, Functions and Operation

1	Dutch type - Allows either total stake or target profit to be selected.	
2	Total bet amount/Target profit field - Allows the total bet amount (stake) or target profit to be entered.	
3	Calculate button - Recalculates the dutch table 4 . Only becomes active after the dutch type has been changed or a new value has been entered in the <Total bet amount/Target profit> field.	
4	Dutch table - Displays the odds (from main handicap screen), stake, return and profit for each runner selected.	
5	Stake/Profit/Return totals - The total stake, profit and returns of this race for the selected runners. Two values may be displayed which show the minimum and maximum profit/return.	

Superform *Online*

Handicap – Special

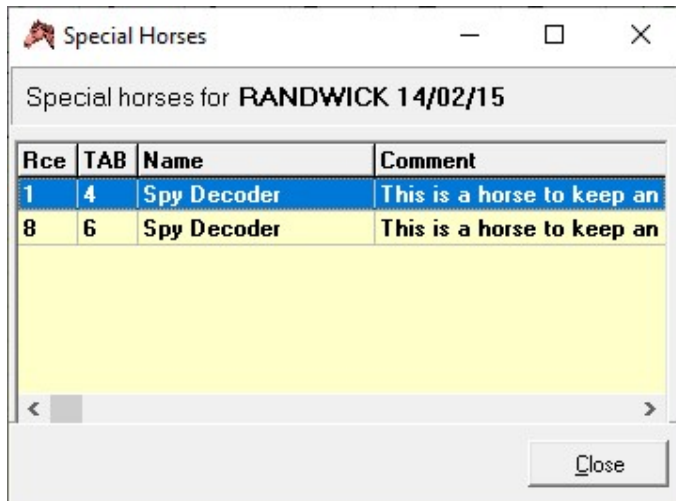

Overview

This function displays any Special Horses that are running at the current meeting. Special Horses can be added by selecting <Utilities/Special Horses> from the main Superform *Online* menu. If a Special Horse is in the current race, the horse name will be displayed in green.

Action

Select <Handicap> from the main Superform *Online* window.

Click <Special> button on Handicap window to display Special Horses window below.

Superform *Online*

Handicap – BRR

Overview

Displays the Base Run Ratings for the current race being handicapped. This function indicates how horses in the current race rate against each other under different assumed conditions. Initially the BRR window will display the Superform summary which falls under six categories;

- Handicap Screen - the base rating and odds for the horse from the Handicap window.
- Current Preparation - the best rating and "indicative" odds based on each horse's current preparation.
- Last Preparation - the best rating and "indicative" odds based on each horse's last preparation.
- Expected Peak - the best rating in each horse's last preparation adjusted for WFA improvement, and "indicative" odds based on that rating.

(The slow track and heavy track categories will be vacant initially but ratings and "indicative" pricelines will be provided once the research has been finalised).

All other Base Run Ratings selections fall under the following six categories based on the state of the track;

- Handicap Screen - the base rating and odds for the horse from the Handicap window.
- Best - the horse's best rating on the state of track selected with "indicative" odds based on that rating.
- Distance (10%) - odds. the horse's best rating at (+/- 10%) of today's distance on the state of track selected with "indicative" odds.
- Distance (20%) - odds. the horse's best rating at (+/- 20%) of today's distance on the state of track selected with "indicative" odds.
- Course and Distance - the horse's best state of track selected rating at today's course and distance with "indicative" odds.
- Course - the horse's best state of track selected rating at today's distance with "indicative" odds.

Action

Select <Handicap> from the main Superform *Online* window.

Click <BRR> button on Handicap window to display Base Run Rating window below.

Handicap – Handicapping table

Display handicapping information for each horse. Each piece of information is separated into columns. Each column is described below in the order they appear in the handicapping table,

TAB	TAB number of the horse
Name	Name of the horse
Ex Pk	Expected peak - The horse's best rating last preparation adjusted for Weight For Age (WFA) improvement.
BRR	Base run rating – The rating chosen for assessment purposes.
Form	Current form - A bonus or penalty reflecting the horse's current form pattern.
Cond	Condition - A penalty applied to the Expected Peak Rating for horses resuming.
Cons	Consistency – A penalty for inconsistency
BP A	Barrier position adjustment - A penalty for poor barrier position.
Own	Own rating - A bonus or penalty supplied by the user
JocRat	Jockey rating - A rating given to each jockey which measures his/her ability. The lower the number the more ability the jockey has.
JAllow	Jockey allowance – allowance claimed by an apprentice jockey.
WOL	Weight over the limit
FR	Final rating – the final or expected rating for each runner
Margin	Margin - The number of kilograms (kg – 1.5kg per length) each horse should finish from the assessed

	"winner".
Pcent	Percent – The percentage chance of the runner..
Odds	The minimum odds acceptable for each horse (based on predicted finish order and margins).

Superform *Online*

Download Files

Overview

This function is an important aspect of the Superform *Online* program. Any file that is to be used in Superform *Online* must be downloaded using this facility. The download files window is divided into areas grouping files together. Below is a list of what files are available and the area they are;

Handicapping file

Race files	The main handicapping files used by Superform <i>Online</i> . Day files area.
Jockey files	Latest jockeys for handicapping files. Day files area.
Model files	Used by the Model reports. Day files area.
ERA files	Used with the ERA reports. Day files area.
Trainer files	Used with the Trainer reports. Day files area.
Insider files	Used with the Insider reports. Insider area. Currently unavailable.
Scratching files	Used to apply latest scratchings to race files. Day files area.

Auxiliary files

Course update file	List of all courses used by Superform <i>Online</i> . Files are updated once a week. File Updates area.

Features, Functions and Operation

1	User details - Display the user name and current account balance. The balance is updated as files are requested by placing a tick next to the meeting.	
2	Area tab - The window is divided into areas to make the list of available files more manageable. There is an area for each day of the week, file updates and Insiders. When an area tab is clicked, the list of files will be updated in the file list 3 .	

3	File list - Displays the list of files available in the area and their associated cost in brackets. The files are arranged in a tree like structure with branches or sub lists. To expand or show the sub lists click the   BE (plus sign) next to the meeting name. To hide the sub lists click the minus sign next to the meeting name.	
4	Sub list - Each meeting is made up of a number of files that appear in the sub list. If there is only one file as in the <File Updates> area there is no sub list associated with each file,	
5	File selection - To request all files for a meeting click the box   BE next to the meeting name. Clicking this box will also request all of the files in the sub list 4. Once a file is requested for download it appears in the files requested list 6. To request a specific file click the + to expand the file list, and click the box next to the file required.	
6	Files Requested list - Lists all the files that are selected for download. To download the files to your computer click the <Download Files> button 11.	
7	File Status - A file name may have one of the following (Dwn) or (Upd) after the file name in the file list 3. This indicates the relationship of the file on the internet to the copy previously downloaded. (Dwn) after the file name indicates the file on the internet hasn't changed since last time it was downloaded. (Upd) after the file name indicates the file on the internet is a more recent file.	
8	Remove button – Removes the currently highlighted file from the Files Requested list 5. Use this facility if you change your mind and do not wish to download a file.	
9	Statement button – Displays your financial statement for a particular time period.	Page 53
10	Download Files button - Downloads all files in the Files Requested list 6 to Superform Online .	Page 55
11	Close button – Closes the Download Files window. If there are any file in the Files Requested list 6 Superform Online will ask if these files should be downloaded before closing the window.

Download Files - Statement

Overview

This function allows a statement to be viewed and printed of all files that have been downloaded for a certain time period. The statement also shows when any payments to the account have been made. The date period of the statement is made from the

Statement Dates window below. Type in the date or click  to display a calendar allowing a date to be selected.

Action

Select <Download Files> from the main Superform **Online** window.

Once a connection is established, click <Statement> button on Download Files window to display the Statement Dates window above.

Enter the start date and end date, click <View> to display the Statement window below.

Download Files – Download Files

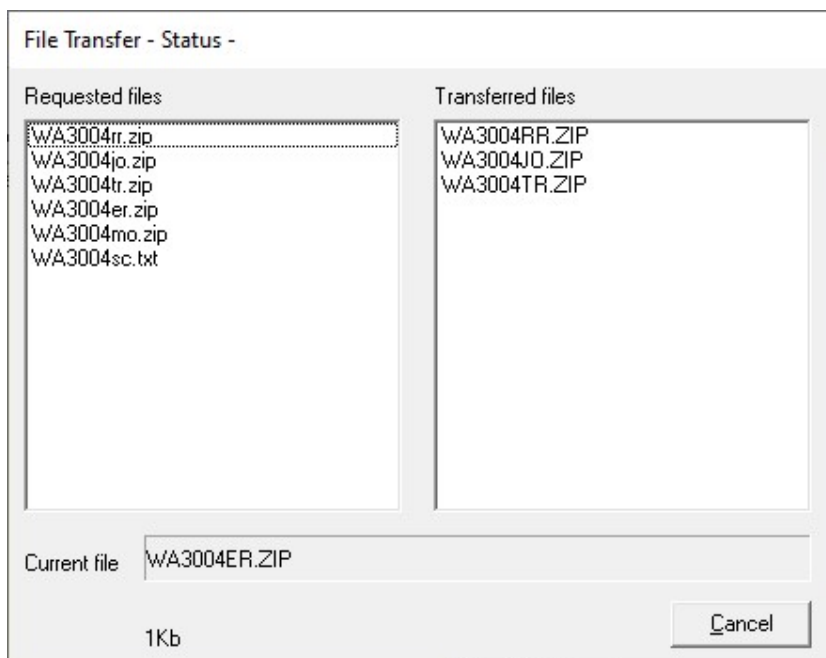

Overview

This function downloads the requested files to your Superform **Online** computer.

Action

Select <Download Files> from the main Superform **Online** window.

Click <Download Files> button on Download Files window to display Statement window. A File Transfer window will be displayed showing the progress of files to be downloaded.

Add Files

Overview

After downloading files Superform **Online** will prompt you to add the downloaded files to your computer. If for some reason you do not wish to add the files immediately, the function Add Files can be used to add the files at a later date.

There are many different file types that can be added to Superform **Online**. They are as follows;

Files specific to a particular meeting

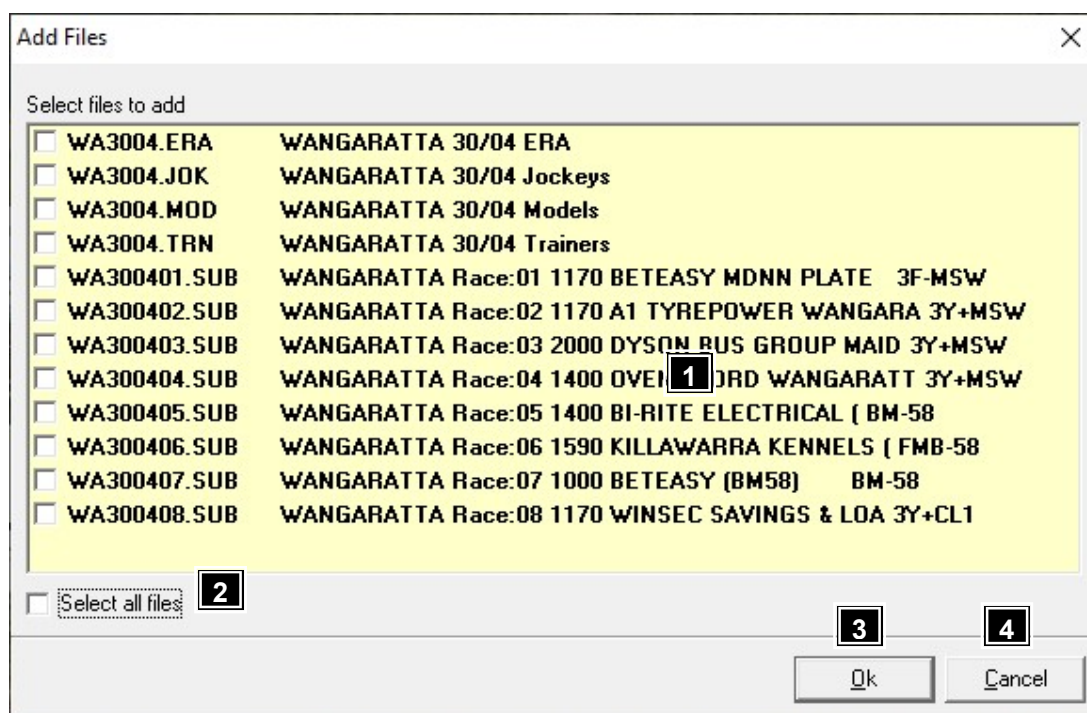

- Race files
- ERA reports
- Jockey files
- Model reports
- Trainer reports
- Scratchings

Auxiliary files

- Insider reports
- Updated course file
- Updated jockey file
- Updated trainer file

Action

Select <Add Files> from the main Superform **Online** window to display the Add Files window below.

Features, Functions and Operation

1	File list - Display a list of all the files that can be added to Superform Online . Place a tick in the box next to the files you wish to add.	
2	Select all files checkbox - Tick this box to select all the files in the file list 1 .	
3	Ok button - Ok will add all files that have been ticked in the file list 1 .	
4	Cancel button - Close the Add Files window without adding any files.

Easy Rater

Overview

Easy Rater provides a powerful way to manipulate the Model Reports. Easy Rater includes the provision to:

- Scratch horses and automatically re-order the model factors.
- Personalise the models by setting your own parameters.
- Set score line and book value parameters.
- View statistics for both a whole meeting and an individual race.
- Printing the Easy Rater report for the whole meeting or an individual race.

Action

Select <Easy Rater> from the main Superform **Online** window to display the Easy Rater window below.

Features, Functions and Operation

1	Select a meeting - Select a meeting by clicking on the name of the meeting from the Meeting list box 1. All races for that meeting will be displayed in the Race list box 2. The Easy Rater Report for race 1 for the selected meeting will be displayed in the Easy Rater Report table 4.	
2	Select a race - Select a race by clicking on the race name displayed in the Race list box 2. The Easy Rater Report for the selected race will be displayed in the Easy Rater Report table 7.	
3	Race header - The race header displays information about the currently selected race.	
4	Market value - Displays the current market or book value. This can be changed by clicking the <Market> button 9.	
5	Formula radio button - Select the formula to be applied in EasyRater. Formulas can be setup by clicking the <Formula> button 10.	
6	Weighting - Displays the weighting that has been applied to each model factor.	
7	Easy Rater table - The body of the Easy Rater Report contains the rankings for each of the 12 assessments. Each column of the Easy Rater Report can be sorted by simply clicking on the heading. The heading in red is the currently sorted heading. This will quickly allow you to see which the most dominant runners for each factor are. A score line is created by adding the ranked score for each model factor and is displayed in the <Sum> column. The lower the sum the better the horses chance of winning. This sum is then converted to odds and is displayed in the <Odds> column. A description of each model factor can be found on Page 8.	Page 8
8	Print button - Print Easy Rater.	Page 58
9	Market button - Allows the book value to be changed and hence the recalculating of odds.	Page 58
10	Formula button - Allows a model factor to be removed, place restrictions on each model factor and apply a weight to each model factor.	Page 59
11	Save button - Save any changes made to scratched and unscratched horses.	
12	Scratch button - Scratches the currently selected horse placing a red line through the horse and removing it from the Easy Rater assessment. To unscratch a horse, select the scratched horse and click the <Scratch> button.	
13	Close button - Clicking the Close button will return to the Superform Online main window.	

Overview

The Print function prints the Easy Rater reports. The Easy Rater report for the whole meeting, the current race or selected races can be printed. This selection is made from the following window.

Easy Rater - Formula

Overview

This facility is divided into 3 parts. The first part allows a weighting to be placed on each of the 12 model factors. More emphasis can be placed on a certain factor, by increasing the weight. A factor can be removed altogether by entering zero in the weight. The second part allows a minimum and maximum rank to be placed on each model factor. Ranks outside the range entered are ignored in the analysis. The third part allows a minimum and maximum rank to be placed on the overall ranking of the runners. Ranks outside the range entered are ignored. Finally a minimum and maximum score can be entered to ignore scores outside a certain range to be ignored.

Action

Select <Easy Rater> from the Superform *Online* menu.

Click <Formula> button on the Easy Rater window to display the Formula window below.

Formula

Weighting **1**

Model 1	Model 2	Improve	Distance	OHS	C'paign	Ex Peak	Ability	Class	Wet	Soft	Heavy	Total

Save Default Save Formula 1 Save Formula 2 Save Formula 3 Ok Cancel

Features, Functions and Operation

1	Weighting - Display the weighting that has been applied to each Model factor. A Model factor can be left out of the equation by entering "0" (without the quotes) in the respective field. If a particular Model factor is especially important a higher weight can be applied to that factor by entering a number greater than 1.	
2	Weighting Percentage - Under each Model weighting a percentage is displayed. This value is the percentage the weighting entered makes up of the overall total.	
3	Minimum and Maximum Rank Values - A minimum and maximum rank can be entered for each Model factor. For example, to restrict the <Model 1> factor to only use the top 5 runners in the calculation enter 1 in the <Minimum> field and 5 in the <Maximum> field.	
4	Scoreline Minimum and Maximum Rank - A minimum and maximum rank can be entered for the ranked score (or sum). A score line is created by adding the ranked score of each chosen Model factor, and thus each score is ranked from lowest to highest. This option allows a restriction on the ranking of the scores used in the calculation of the odds.	

5	Scoreline Minimum and Maximum Score - A minimum and maximum score can be entered to restrict only those runners whose score (or sum) fall within the minimum and maximum range.	
6	Save Default button - Once a formula has been defined, the options can be saved as the default to be used for all future races. Superform Online allows four different formulas to be saved for future races.	
7	Ok button - Accept the changes and recalculate the sum and odds on the Easy Rater window.	
8	Cancel button - Close the Formula window ignoring any changes returning to the Easy Rater window.	

Superform **Online**

Multi-Bet

Overview

Multi-Bet allows the calculation and analysis of trifectas, quinellas and doubles. With Multi-Bet you are able to highlight standouts, determine combinations, and calculate outlays appropriate for a particular takeout figure.

A basic element of Multi-Bet is a priceline referred to as the <Own Odds>. Combinations are based on these <Own Odds> or a comparison can be made between the <Own Odds> and another set of odds called <Comparative Odds>. A comparative approach embodies the concept of win value betting as it applies to multiple betting. A value combination is one whose odds are equal to or less than those likely to be paid should the combination be successful. For example, a trifecta combination at your own odds might be a 130/1 chance but the same trifecta, based on the comparative odds might be expected to pay off at 150/1. It follows therefore, that this particular combination is likely to represent value and should be bet.

Action

Select <Multi-Bet> from the Superform **Online** menu to display the Multi-Bet Menu window below.

The Multi-Bet Menu dialog box contains two radio buttons: "Trifecta/Quinella analysis" (selected) and "Double analysis". At the bottom are "Ok" and "Cancel" buttons.

Choose the multi-bet type and click <Ok> button to display the Multi-Bet Meetings window below. If double analysis was selected from the Multi-Bet Menu above, there will be two Multi-Bet Meetings windows, one for each leg of the double. Select the meeting to Multi-Bet. The races for the highlighted meeting will be displayed. Select the race to Multi-Bet.

The Multi-Bet Meetings dialog box has two main sections. The left section, "Select meeting to multi-bet", shows a list of meetings: WANGARATTA (30/04/20), WARWICK FARM (29/04/20), and RANDWICK (14/02/15). The right section, "Select race to multi-bet", shows a list of races for the selected meeting. The races are:

	Race name	Dist	Claim	Age class	Starters
1	BETEASY MDNN PLATE	1170		3F-MSW	10
2	A1 TYREPOWER WANGARATTA M	1170		3Y+MSW	12

Features, Functions and Operation

1	Title - Displays the type of Multi-Bet selected. In this case it is a Trifecta Analysis. Other types of Multi-Bet include Quinella Analysis and Double Analysis.	
2	Race header - The race header displays information about the currently selected race.	
3	Standout selection - The columns <1 st >, <2 nd > and <3 rd > allows standout runners to be selected. Tick the box (using the mouse or <SpaceBar> on the keyboard) next to the horse's name to stand out a horse for 1 st , 2 nd or 3 rd . In Quinella Analysis runners can only be a standout for 1 st or 2 nd , and in Double Analysis the runner can only standout for 1 st .	
4	Own Odds column - Allows own odds to be entered or loaded for each runner. Predefined odds calculated from the Base Run Rating can be loaded by clicking the <Load Odds> button 10 .	
5	Comp Odds column - Allows comparative odds to be entered or loaded for each runner. Predefined odds from the Base Run Rating can be loaded by clicking the <Load Odds> button 10 .	
6	Multi-Bet settings - Displays parameters including Takeout, Bet units, Minimum and Maximum odds which can all be set by clicking <Modify> button 7 . The Combinations and Outlay are updated after recalculating the combinations by selecting the <Recalculate> button 11 . The Total own market and Total comp market are the sum of the percentages of the Own odds and Comp odds columns respectively.	
7	Modify button - Allows the Multi-Bet parameters to be changed	Page 62
8	Trif/Quin button - Switches between Trifecta Analysis and Quinella Analysis. If in Double Analysis mode then <Trif/Quin> button is renamed <Togg Leg> and the button now toggles or switches between the first leg and the second leg of the double.	
9	All Form button - Displays the form for all runners in the race.	Page 31
10	Load Odds button - Allows the own odds and comparative odds to be loaded from a predetermined priceline. These odds are calculated from the Base Run Ratings.	Page 62
11	Recalculate button - Recalculates the combinations. The result are displayed in the number of combinations and outlay in the Multi-Bet settings 6 .	
12	Save button - Saves the current details, so when switching between Trifecta Analysis and Quinella Analysis and switching legs in Double Analysis mode the current information is retained when switching back.	
13	Form button - Display the form for the currently selected horse.	Page 37
14	Save Odds button - Allows the Own odds or Comparative odds to be saved so next time the current race is loaded these odds can be used again.	Page 63
15	Combinations button - Display a list of all the combinations. This option should only be done after the <Recalculate> button.	Page 64
16	Print button - Prints the Multi-Bet details and all runners for the current race.	Page 65
17	Close button - Close the Multi-Bet window and return to the Multi-Bet Meetings window.	

Overview

This function allows the Multi-Bet parameters to be changed. Parameters include the Takeout figure and the bet units to use. The Own market level and Comparative market levels can be modified to a new market percentage. The minimum and maximum odds can be set to restrict the odds of a combination. If comparative odds are to be used tick the <use comparative odds> check box. The values entered can be saved as defaults for future races by clicking the <Save> button.

Action

Select <Multi-Bet> from the Superform ***Online*** menu.

After selecting the race to Multi-Bet and the Multi-Bet window is displayed click <Modify> button to display the Modify Multi-Bet Inputs window below.

The 'Modify Multi-Bet Inputs' dialog box contains the following fields and controls:

- Takeout: Text box with value 1000.00
- Bet units: Text box with value 1.00
- Own market level: Text box with value 0%
- Comp market level: Text box with value 0%
- Minimum odds: Text box with value 0
- Maximum odds: Text box with value 1000
- Use comparative odds: Check box (unchecked)
- Buttons: Ok, Cancel, and Save

Overview

This function allows own odds and comparative odds to be loaded from a predefined priceline. Select whether to load own odds or comparative odds from the Load Odds window below.

The 'Load Odds' dialog box contains the following controls:

- Radio buttons: Load own odds (selected) and Load comparative odds
- Buttons: Ok and Cancel

Action

Select <Multi-Bet> from the Superform ***Online*** menu.

After selecting the race to Multi-Bet and the Multi-Bet window is displayed click <Load Odds> button to display the Load Odds window above. After clicking <Ok> button the Own Odds Available Pricelines window will be displayed.

Features, Functions and Operation

1	Priceline type - Display the three priceline types, Miscellaneous, Non WFA adjusted and WFA adjusted. To make the priceline list 3 active select the appropriate priceline type.	
2	Priceline selected - Displays the highlighted priceline in the priceline list 3 . The active priceline is the priceline not greyed out.	
3	Priceline list - Displays a list of all pricelines for a priceline type 1 .	
4	Ok button - Closes the window accepting the currently selected priceline.	
5	Cancel button - Closes the window ignoring any changes.
