## Explanation of the Wizard Essentials Wrat4 Report

The Essentials Wrat4 is a print that focuses on the top four Wrat runners, which facilitates a comparison of the data for the main chances in the race. Historically the top 4 Wrat runner have a combined win strike rate of nearly 70%. And with some judicious race elimination it is possible to improve that to better than 80%.

For a detailed explanation of the columns in this report, please refer to the **How to Read Wizard Essentials** guide. The descriptions below are short summary of that guide.

**Horse Name:** Name of the horse

The single asterisk (\*) next to the horse's name indicates the jockey has won on the horse. A double asterisk (\*\*) indicates a winning jockey back on replacing a jockey who has not won on the horse previously.

**Age / Sex:** The age of the horse (years) and sex of the horse

**Form:** The finishing positions of the horse in its last four starts.

**RFS (Runs From Spell):** If the horse is resuming, or having its first ever race start, the number shown will be 1. That is, this run is the horse's first start this preparation.

**EOdds Pre-post market:** The Wizard Essentials pre-post market is different to other pre-post markets in that it is a composite, created by combining a number of different sources into one market.

**Wrat:** This Wrat ratings assessment takes into account relative weight handicapping advantage and is adjusted (weighted) for the following factors: the quality of current form, barrier position, form cycle, recency, distance ability, consistency, jockey, and trainer.

The top rated runner in the race has a rating of 100. A runner having its first race start has no Wrat score.

**Wmod:** The Wizard Wmod assessment is based on a regression analysis of race results over a 10 year period.

**Whcp:** The Wizard Whcp assessment is an almost pure relative weight assessment with minimal input from other factors. The only adjustments to the base ratings analysis involve bonuses or penalties for form cycle (expected improvement, deterioration), consistency, barrier position, and jockey ability.

**Wexpk (expected peak):** The Wexpk (expected peak) analysis assesses the horse on its best (weight for age adjusted) rating from its previous preparation as well as its current preparation. It is looking for the horse that can win if it runs to its proven best form.

As with Whcp, the Wexpk assessment can return equal top-rated runners, that is, more than one 100 pointer in a race.

**Expected Peak (Expk) Date and Preparation:** The Expected Peak rating can be drawn from either the current preparation or the previous preparation.

**CarW% (career win percentage):** In this column Essentials shows the number of career wins and the current career win percentage. Horses without a win (maidens) will have no details recorded in this column.

**WPS LY (wins-places-starts in last year):** In this column Essentials shows the number of wins and minor places (2nd and 3rd) and the

number of starts recorded by the horse in the past 12 months.

**TCDW (track, class, distance, wet going):** This Essentials column has a quick reference guide as to how a runner has performed under four key conditions racetrack, class, distance, going.

**BP (barrier position):** The barrier position.

**Pace - running style:** The running style of a horse is often an important factor in deciding the final outcome of a race, with history showing that horses that race in or near to the lead, especially by the home turn, enjoy an advantage over backmarkers. (Check of the Wizard track profiles to confirm this observation.)

**The coding used in the Pace column is as follows:** F (front-runner), O (on pace), M (midfield and off pace), B (backmarker).

The numeric following the alpha code is the possible in-running position of the horse given its more recent race history.

**FldStr (Field Strength):** The Field Strength (FS) figure measures the difference between the quality of the field against which the horse raced last start and will confront in the forthcoming race.

**Course (racetrack):** Shown here is the win minor placings starts record of each horse at today's racetrack.

**Dist (distance):** Shown here is the win minor placings starts record of each horse at this distance, or over a distance within 10% of the distance of the forthcoming race.

**Crse+Dst (course and distance):** Shown here is the Win minor placings starts record of the horse at this course and the distance, or within 10% of the distance of the forthcoming race.

**Filter:** The Wizard examines and reports on some key positives and negatives facing each runner in the race.

**Neg (Negatives):** The Wizard analysis of negative factors facing each runner is similar in concept to the Wizard filter analysis, but is even more demanding.

**Jockey:** Name of the jockey engaged to ride the horse.

**Joc/Hor (jockey/horse):** This Essentials column shows the record of the jockey when riding this horse.

**Trainer:** The name of the trainer or training partnership.

**J12m (jockey, last 12 months):** In this Essentials column we show the jockeys win percentage over the past 12 months when riding the race favourite.

**T 12m (trainer, last 12 months):** In this Essentials column we show the trainers win percentage over the past 12 months when training the race favourite.

**JT 12m (jockey/trainer combination in last 12 months):** In this Essentials column we show how well the jockey/trainer combination has performed with the race favourite over the past 12 months.
